The shrinking role of big screens heralds a change in how we communicate with our devices and each other.

Commerce is a conversation: Survey on Amazon Echo and Voice Assistants

September 14, 2016 by [Cherian Abraham](#)

Smartphones offer brands a ubiquitous, continuous and contextual delivery channel, and yet it requires us all to learn a new language of taps and swipes to navigate through apps. Often this poses more complexity that manifests in friction for the consumer who must wade through a series of screens to have a question answered. Messaging and conversational interfaces offer the possibility of a clean and simple user experience without having to learn a new syntax.

It is that ease of use and the resulting utility of a conversational interface in controlling and automating mundane tasks that have manifested itself in the popularity of Amazon Echo.

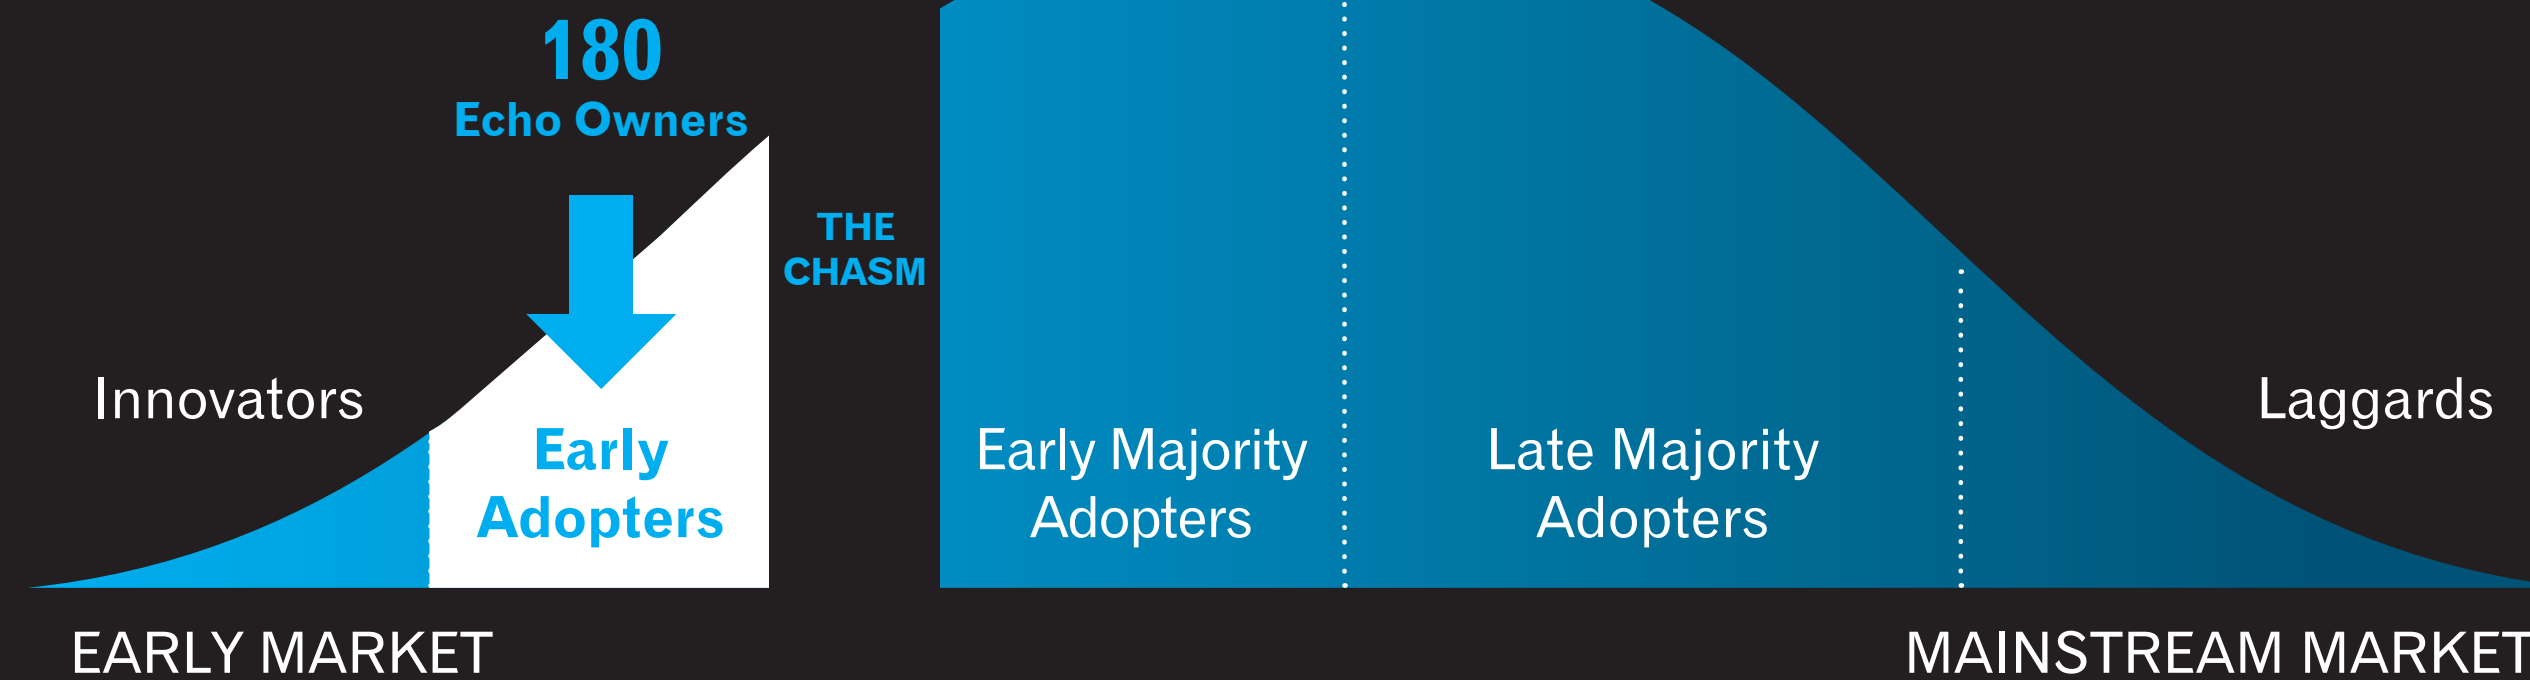

AMAZON ECHO STUDY & FINDINGS

From May 12–16, 2016, Experian and Creative Strategies surveyed nearly 1,300 consumers to understand their usage of and satisfaction with Amazon's Alexa versus other top virtual assistants. Our panel included 180 early adopters who own an Amazon Echo.

OUR SURVEY FOCUSED ON EARLY ADOPTERS

To join our panel and participate in future studies, click here to opt in:

<http://bit.ly/29VTIhr>

WHERE ARE OWNERS USING THEIR ECHO?

50.9%
USE THEIR ECHO
IN THE **KITCHEN**

33.5%
USE THEIR ECHO IN
THE **LIVING ROOM**

WHAT TASKS ARE ECHO OWNERS REPEATING MOST OFTEN?

EMERGING ECHO HABITS

Tasks owners are repeating most often

"I AM USING IT LESS."

"MY USAGE IS ABOUT THE SAME"

"I AM USING IT MORE."

WHAT DO ECHO OWNERS SHOP FOR MOST OFTEN ON AMAZON PRIME?

Nearly 96% of Echo owners in our survey use the Amazon Prime service; yet only 32.1% have asked Alexa to purchase an item at least once. However, this percentage is likely to increase over time given that 39.0% of respondents are increasing their Echo usage and becoming more comfortable using their voices to shop.

To get a sense of what Echo owners are likely to ask Alexa to buy in the future, we asked which product categories they most often buy on Amazon Prime today via any channel (e.g. Amazon app, online, asking Alexa or otherwise).

31.1%

HOUSEHOLD ITEMS

Detergent, paper towels, etc.

26.4%

HEALTH & PERSONAL CARE

Razors, shaving cream, etc.

18.9%

BABY PRODUCTS

Diapers, wipes, etc.

14.9%

PET PRODUCTS

Pet food, treats, etc.

10.1%

BEAUTY PRODUCTS

Skin creams, lotion, etc.

10.1%

BEVERAGES & SNACKS

Snacks, coffee, water, etc.

Based on our research, Household Items and Health & Personal Care are likely to be among the top Amazon Prime categories for future purchases using Alexa.

9 things Alexa can't yet do

Alexa devices come with a laundry list of features, functions and integrations. However, there is a long list of things Alexa isn't capable of yet. Some of the missing features might surprise you.

Amazon at CES: 'We believe there will be an Alexa skill for everyone, for everything'

Alexa, can you please acquire the skill of conversation?

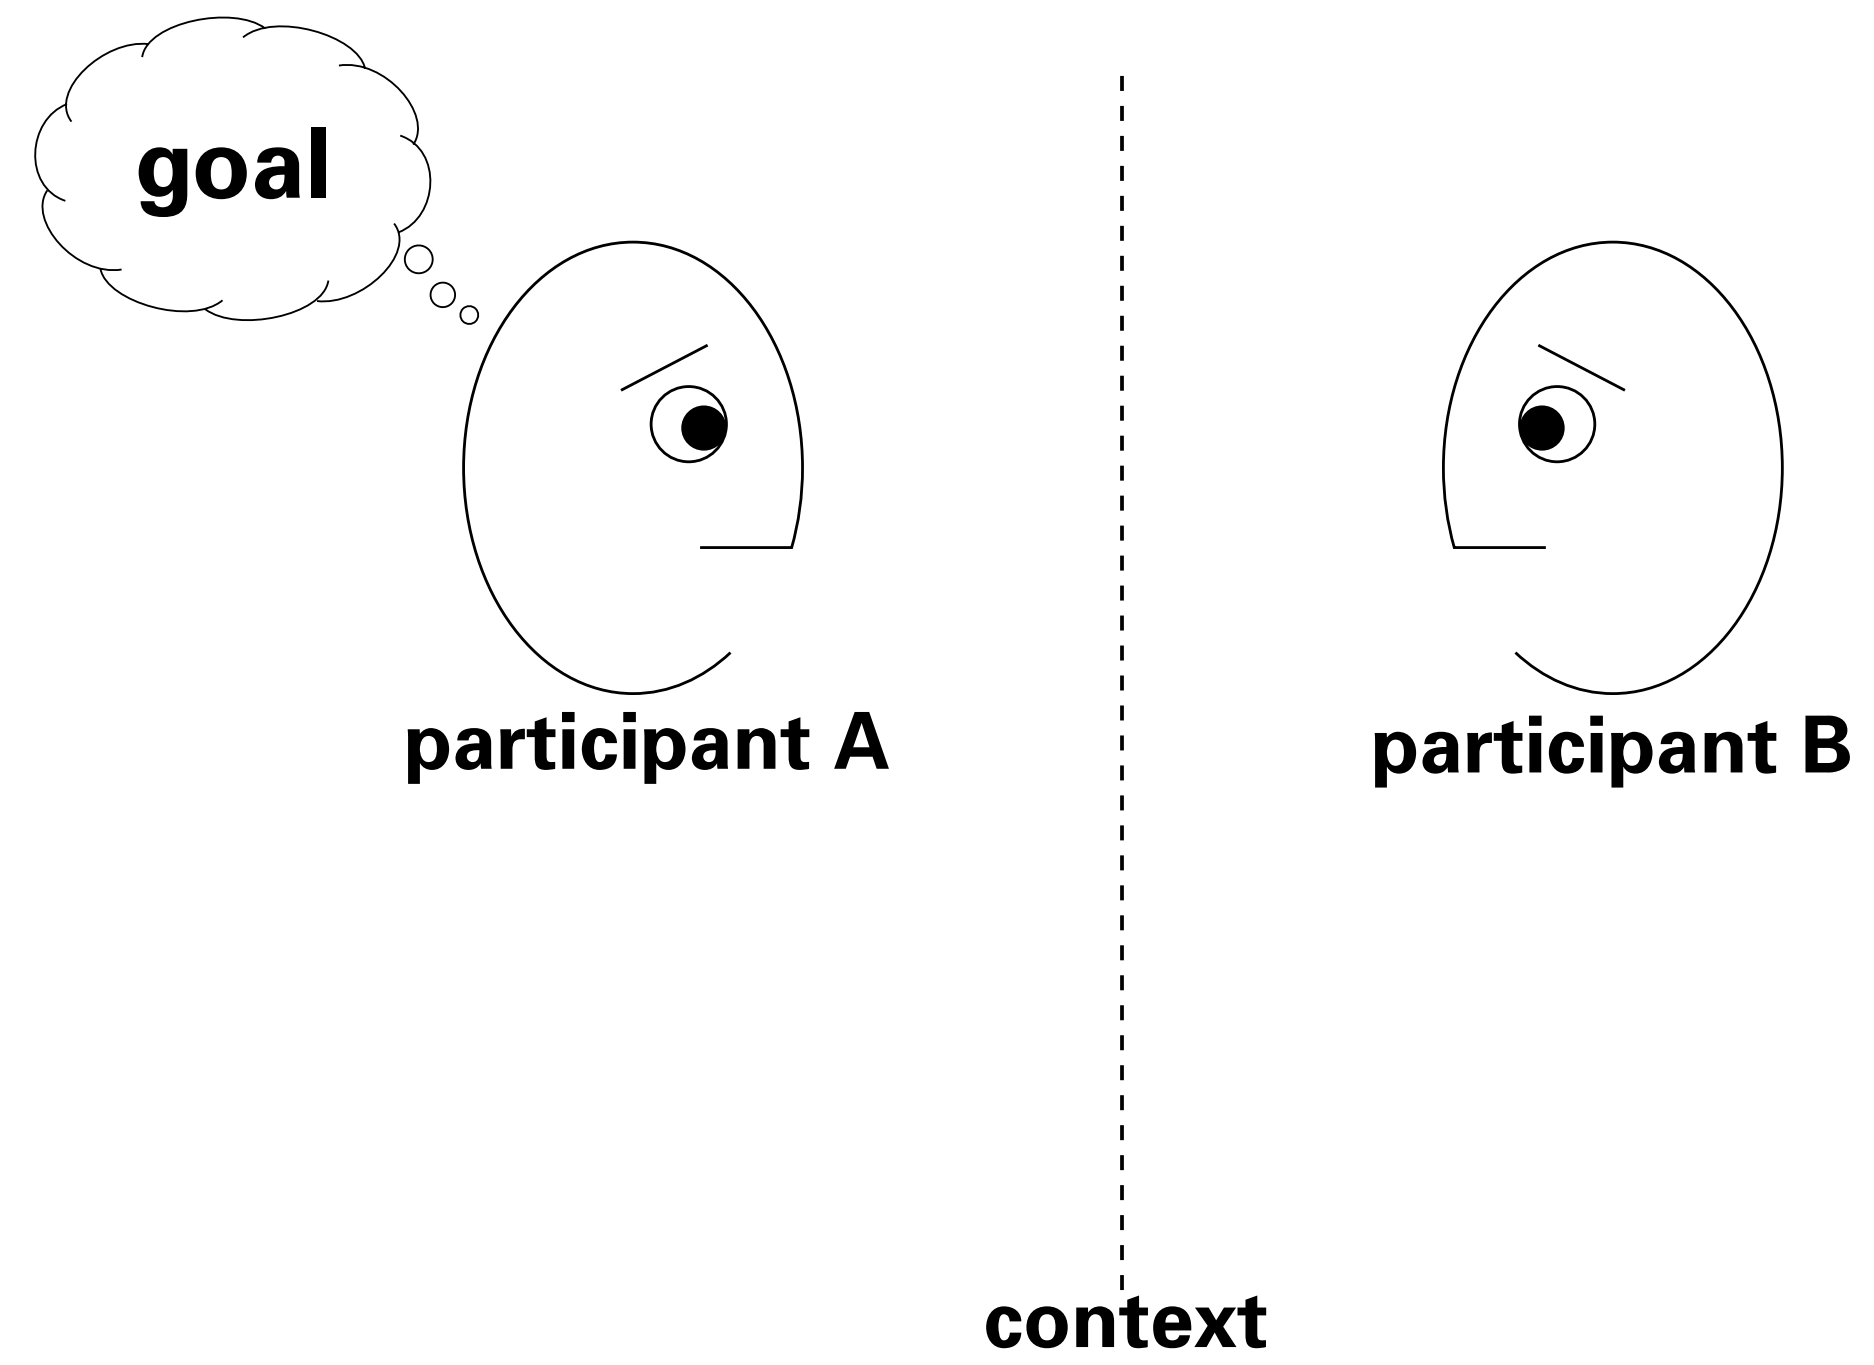

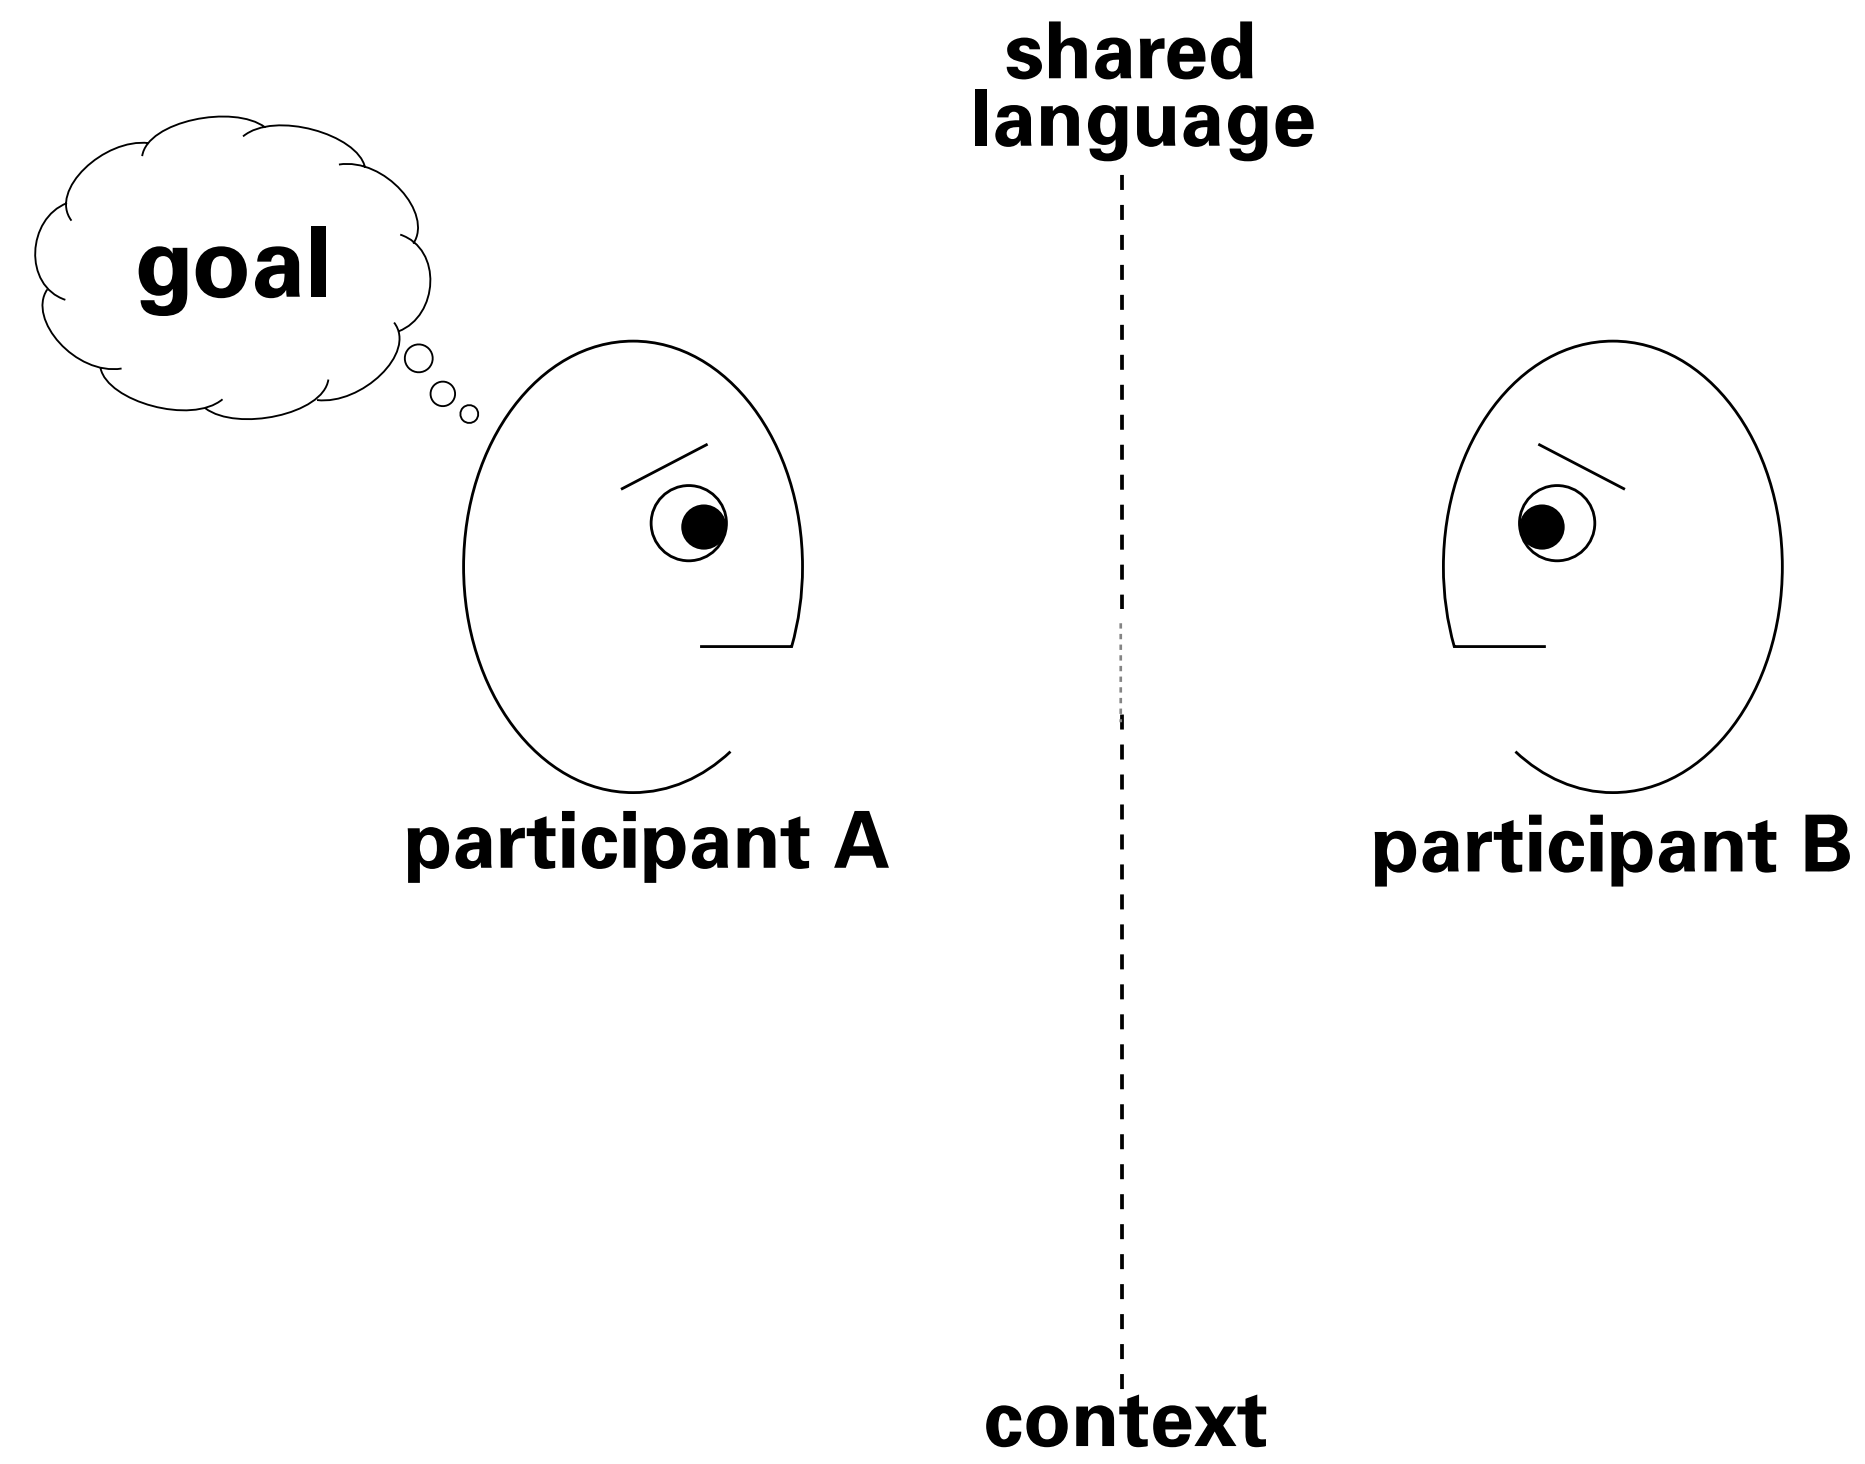

Alexa, can you please acquire the skill of conversation
Alexa, what is “conversation”?

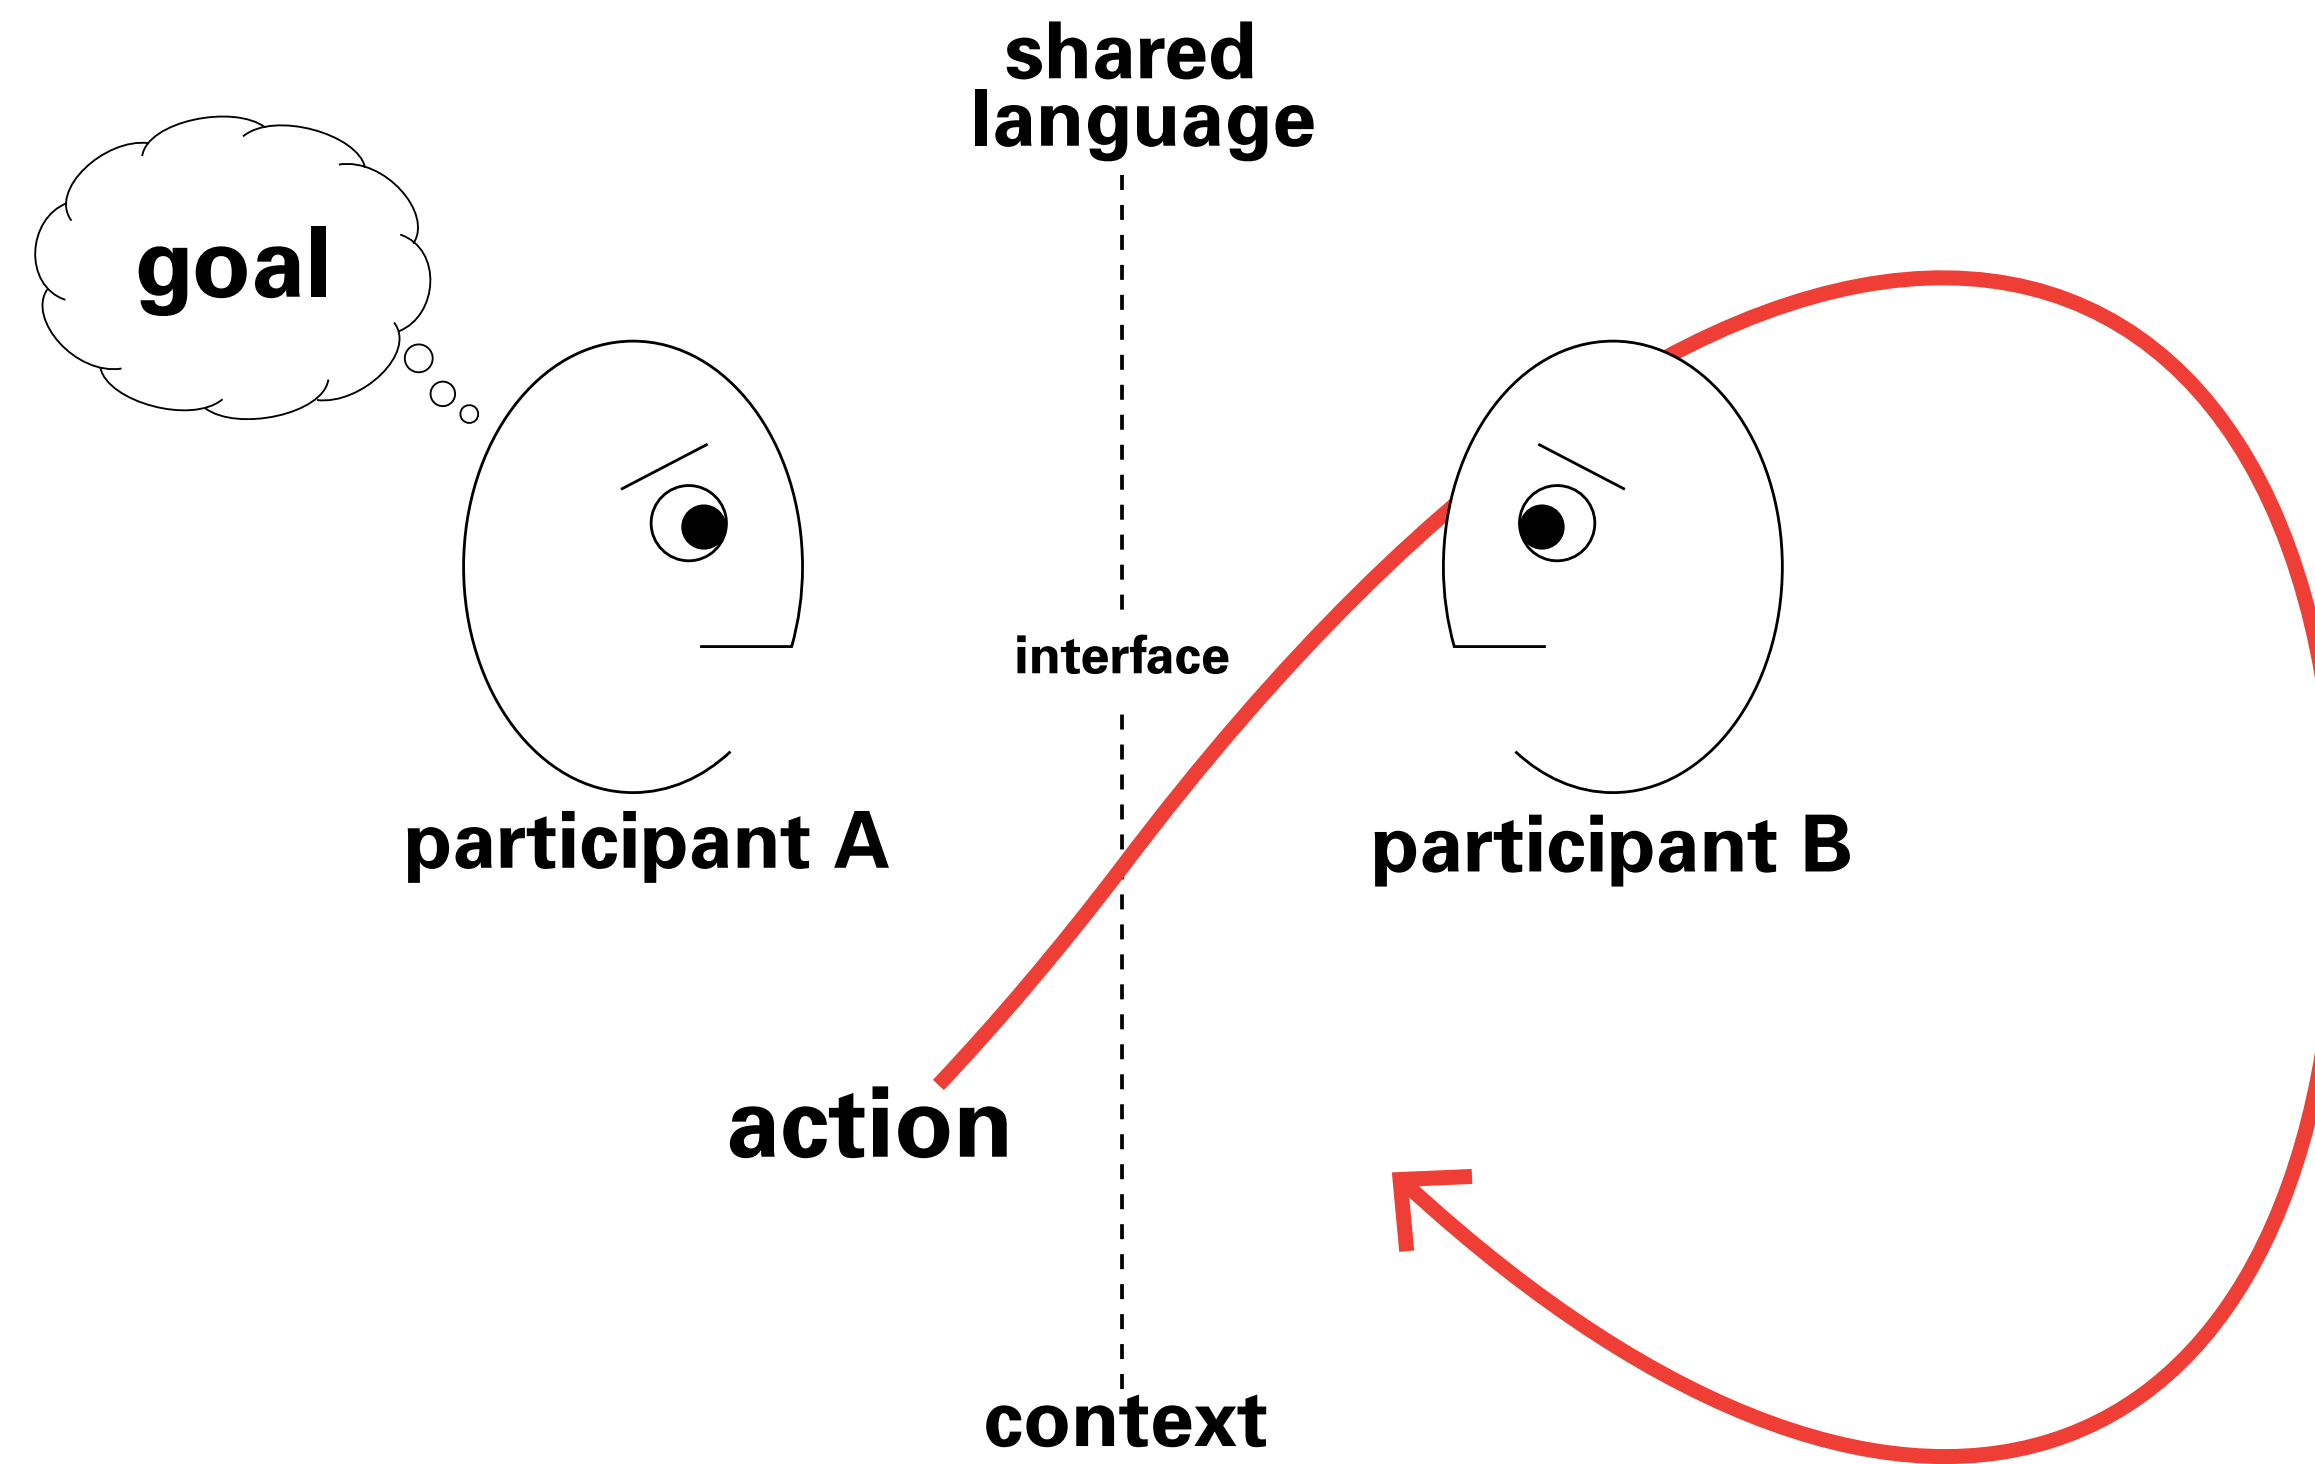

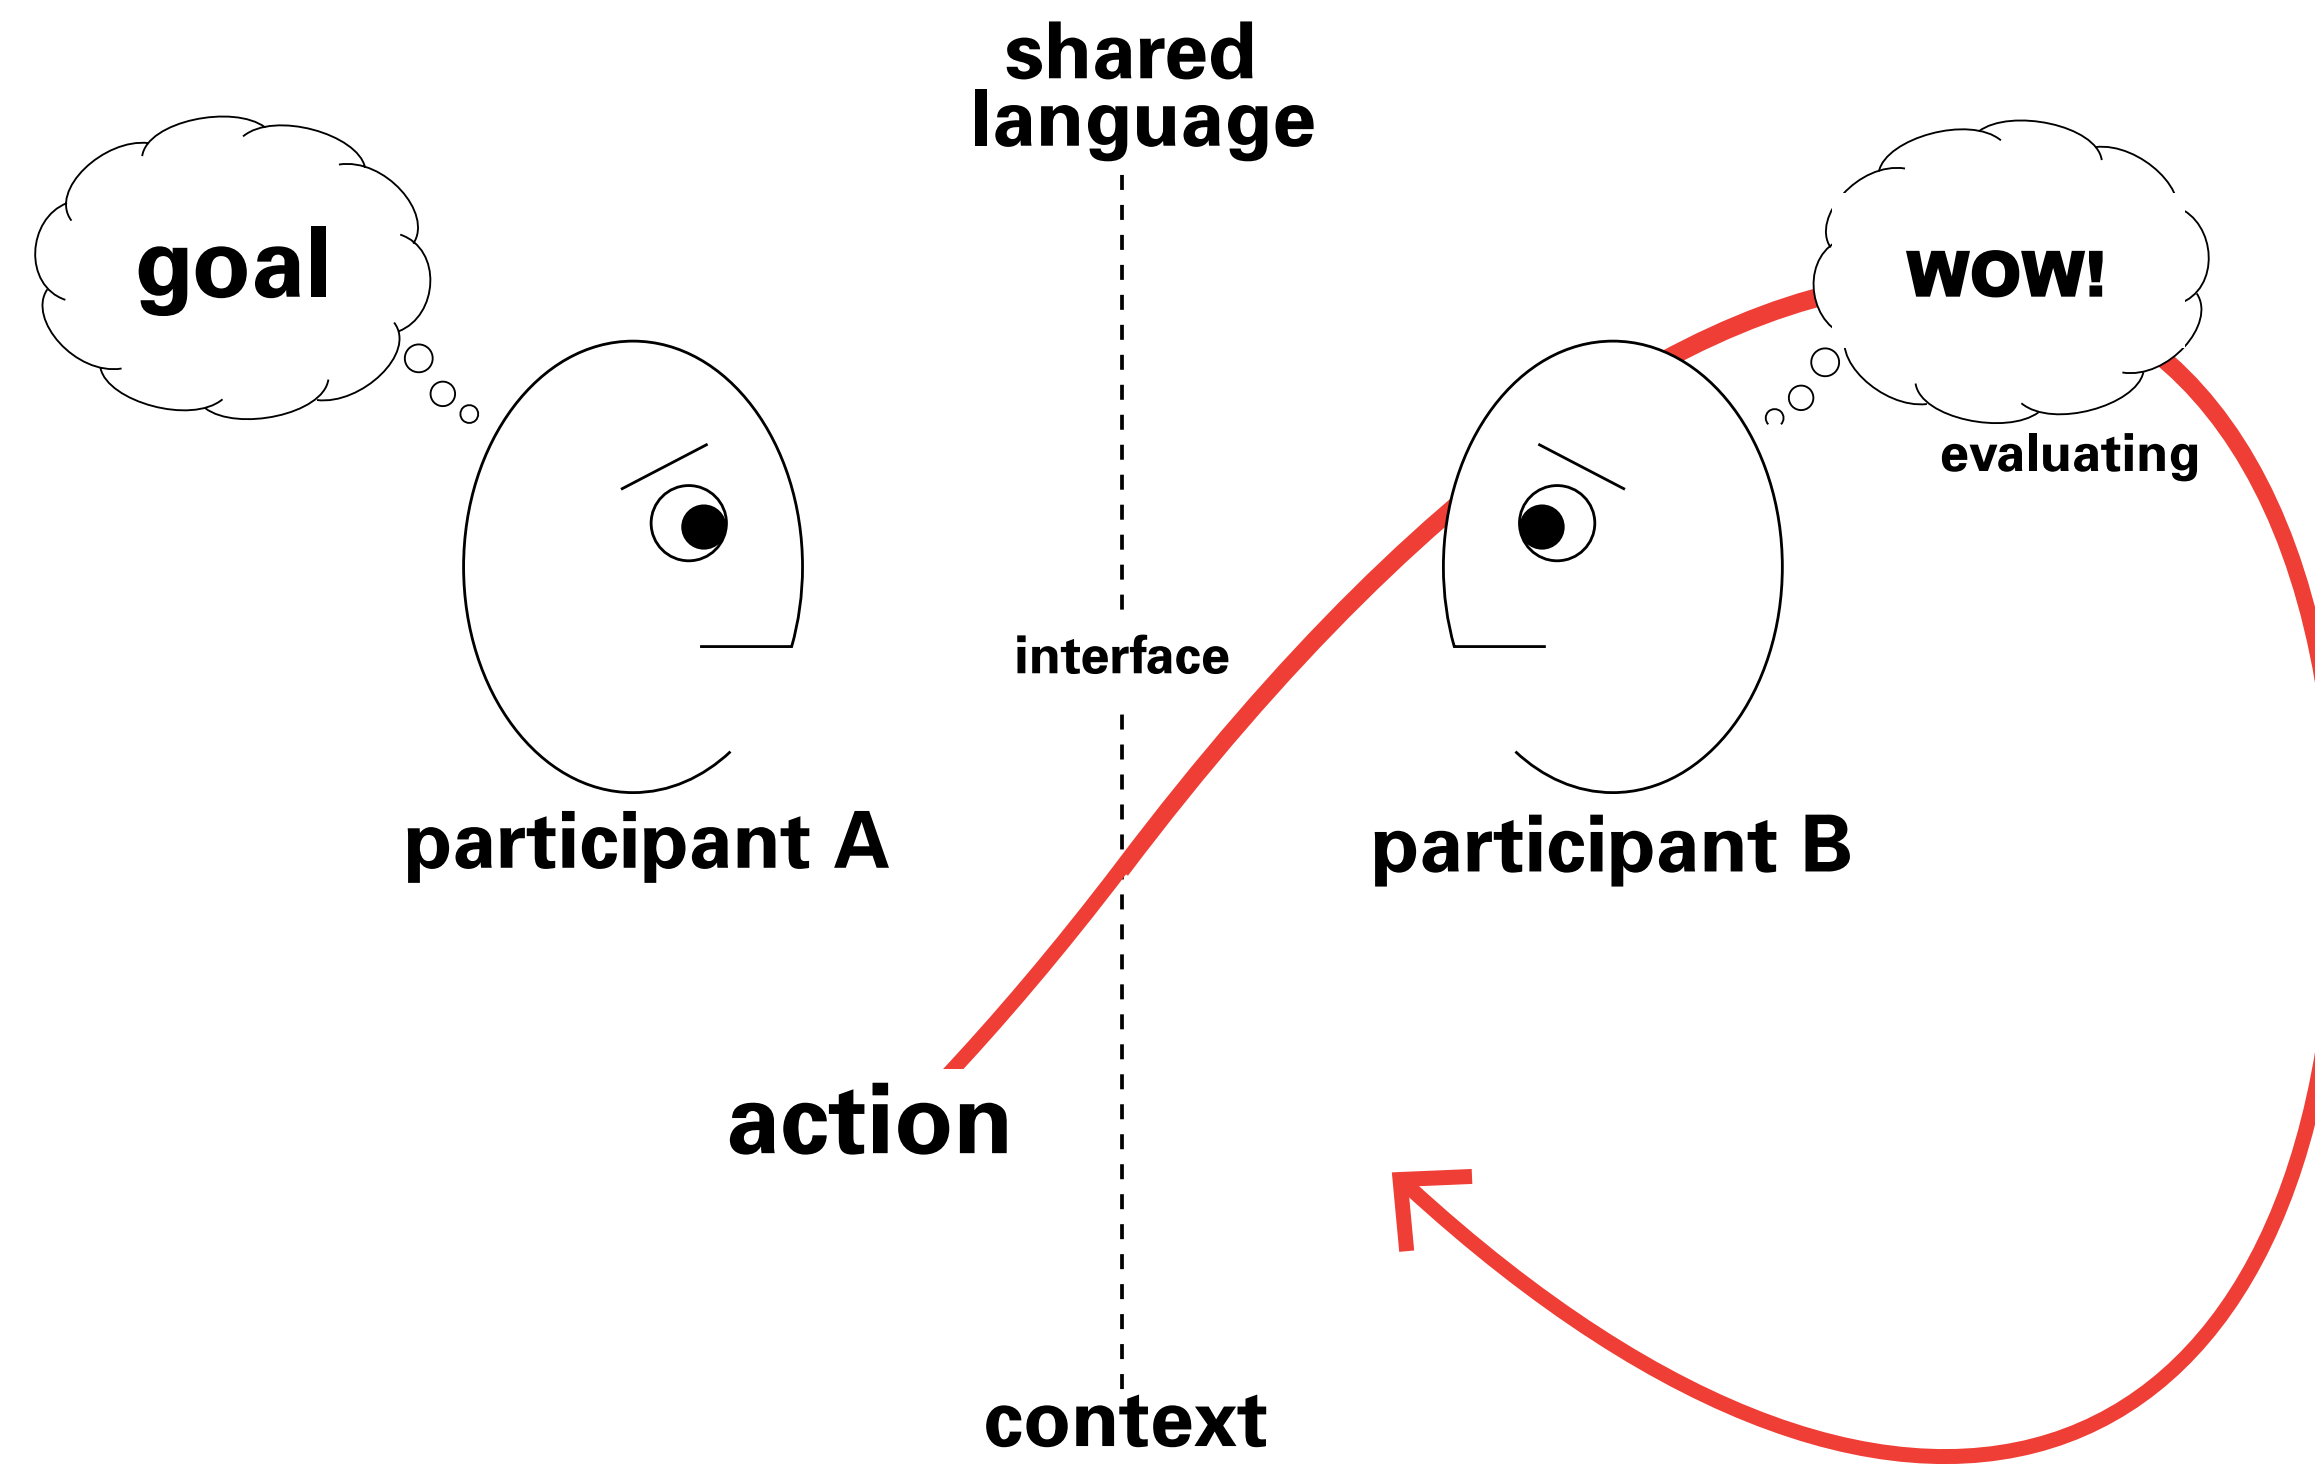

— after Dubberly Design Office 2008
after Paul Pangaro
after Gordon Pask

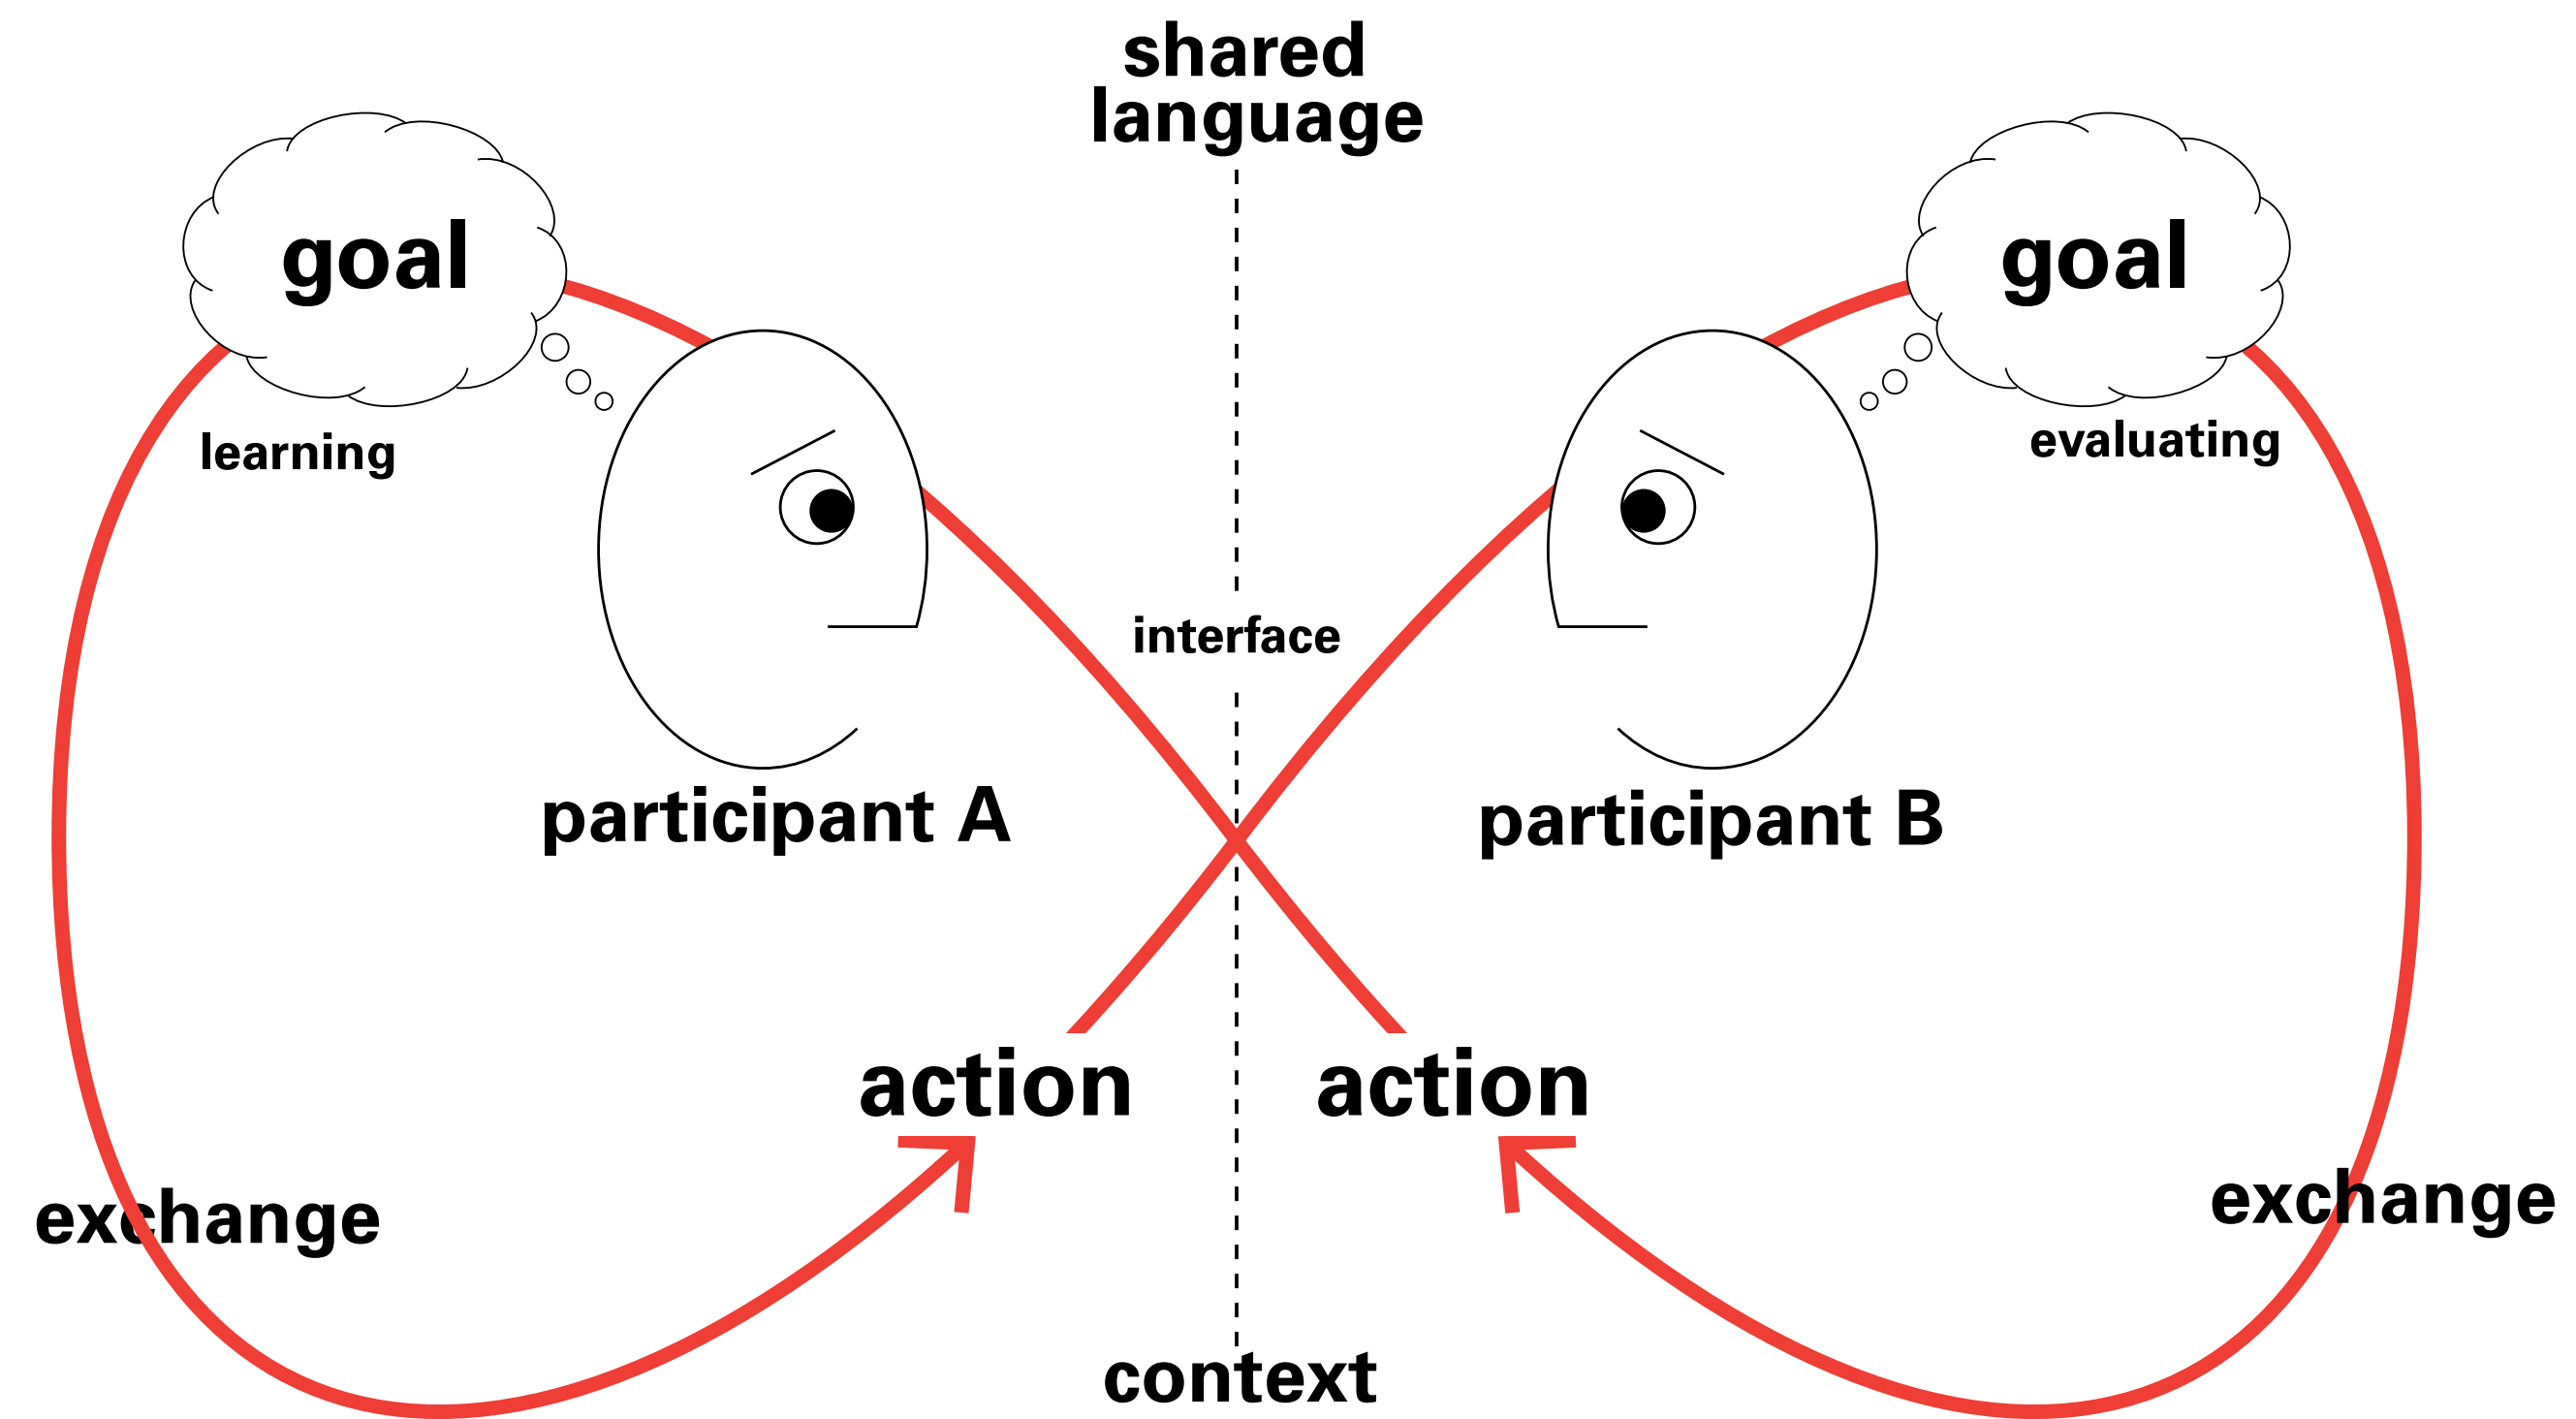

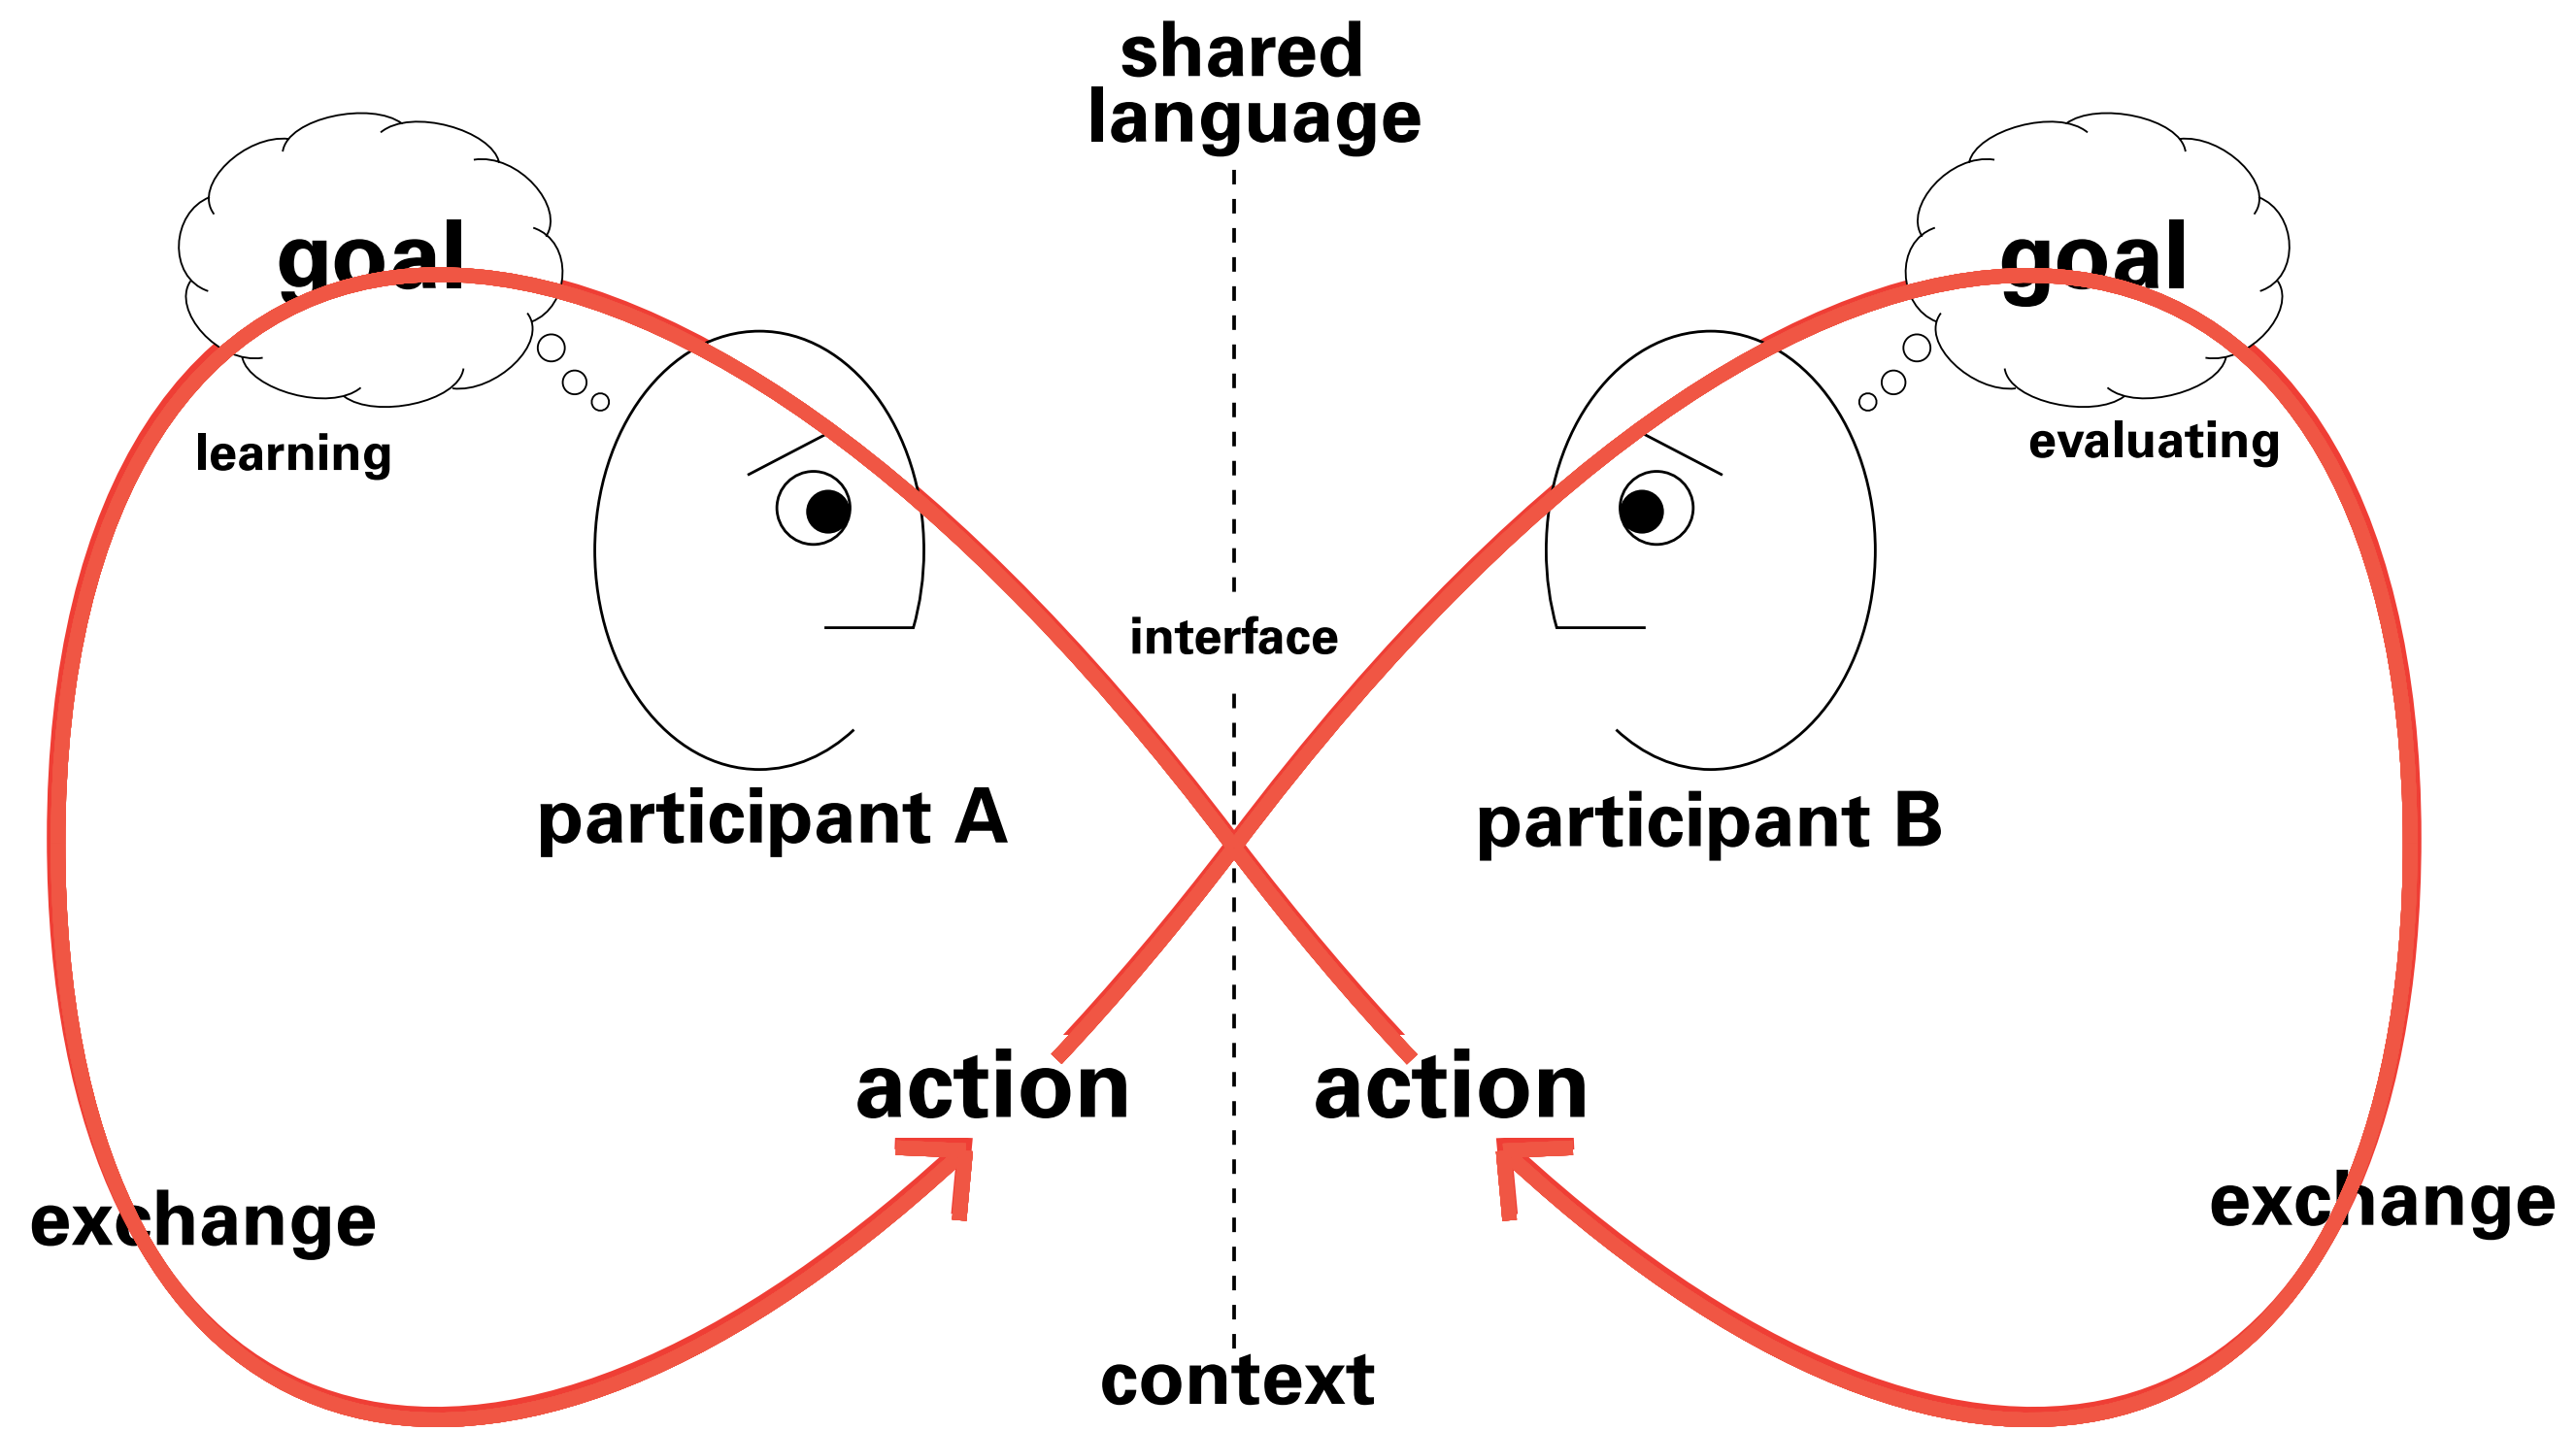

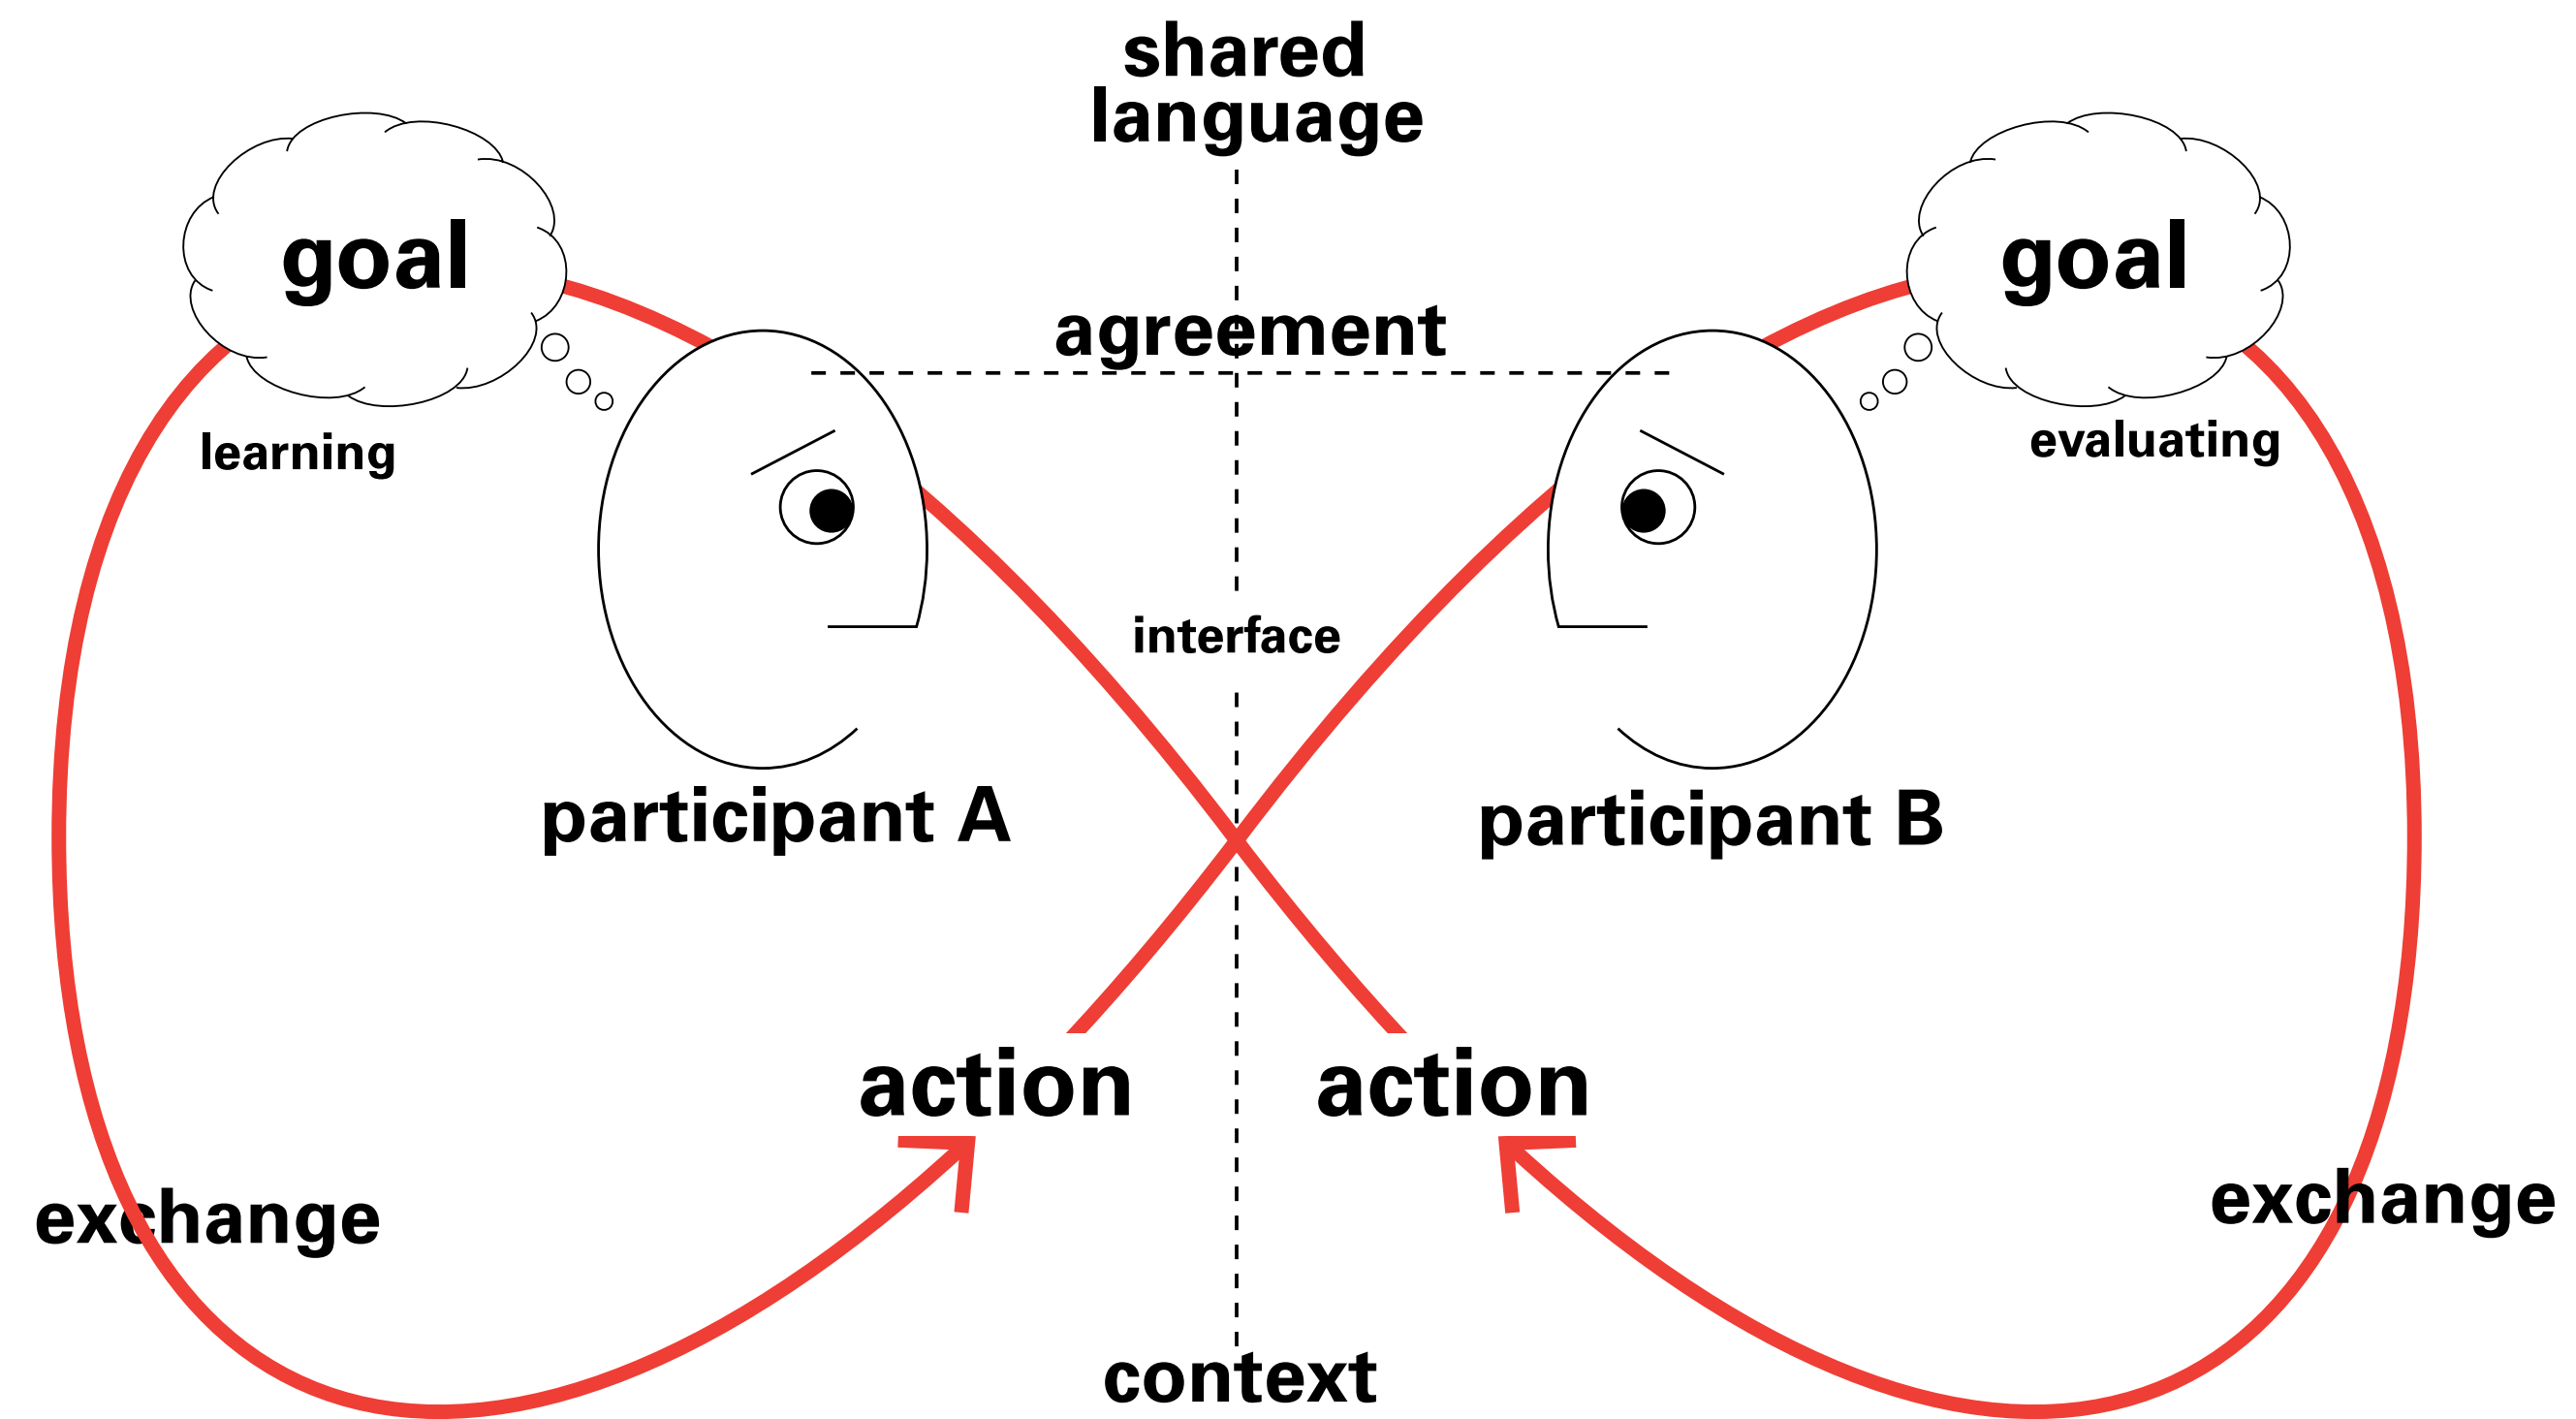

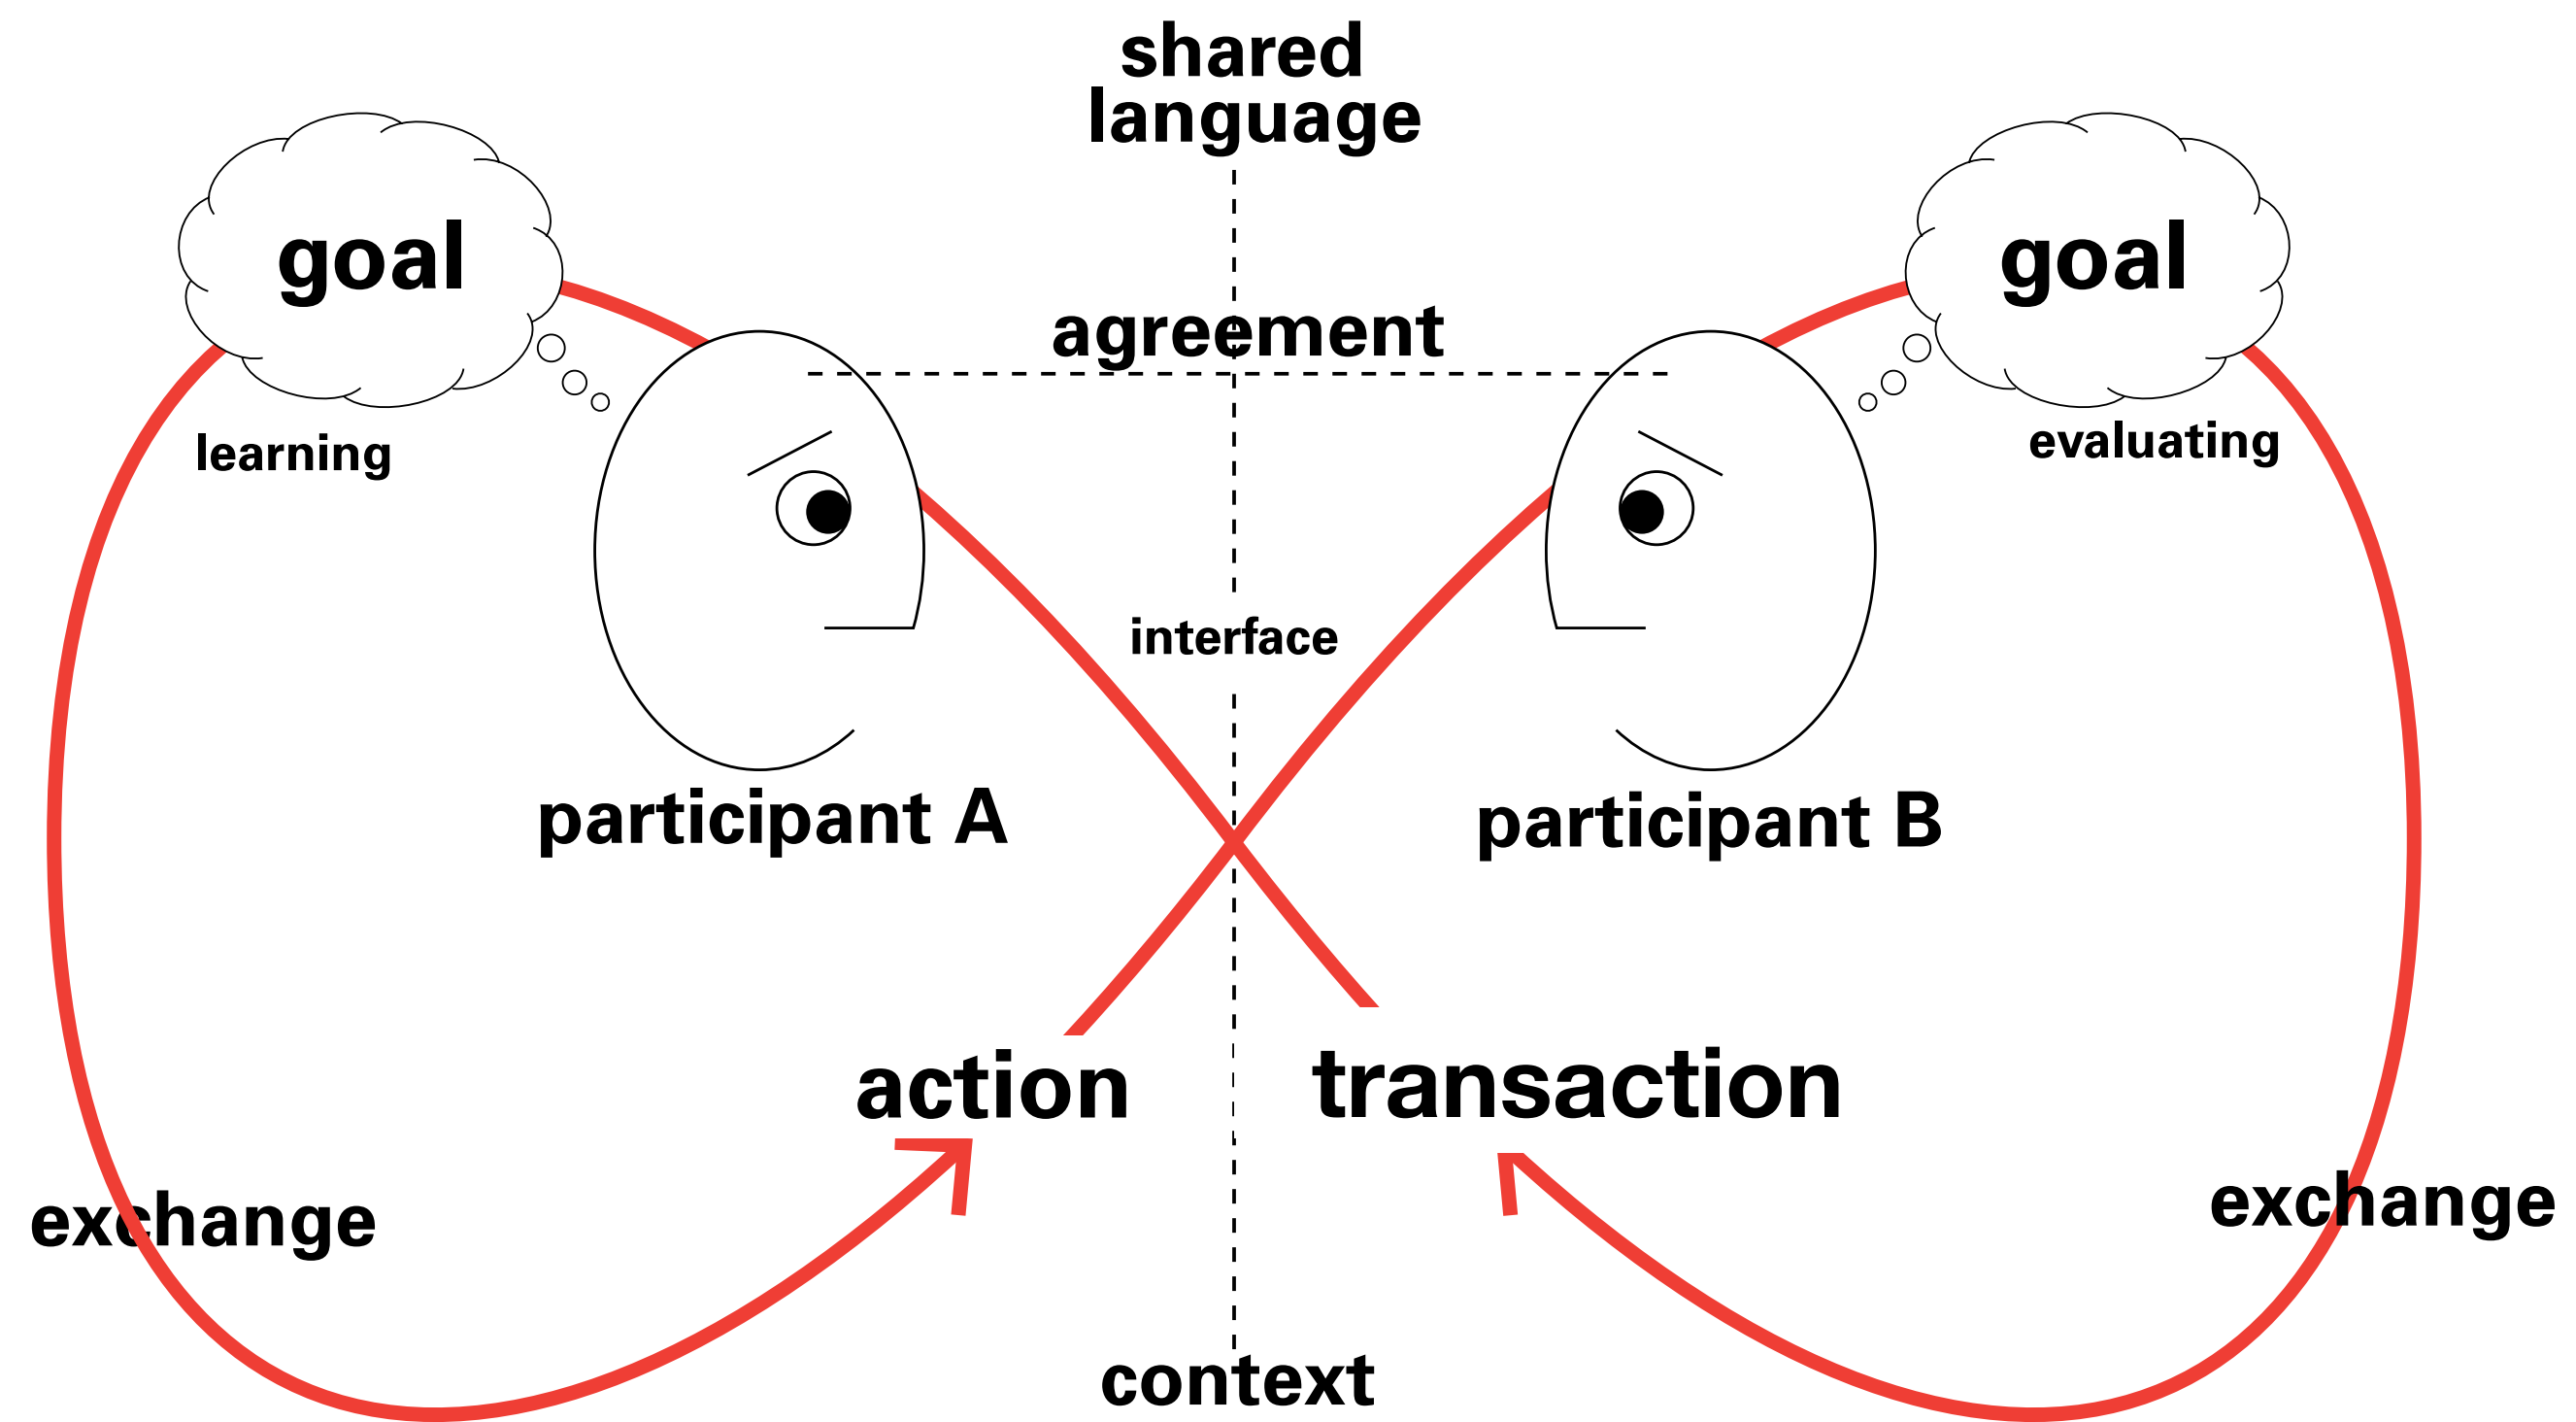

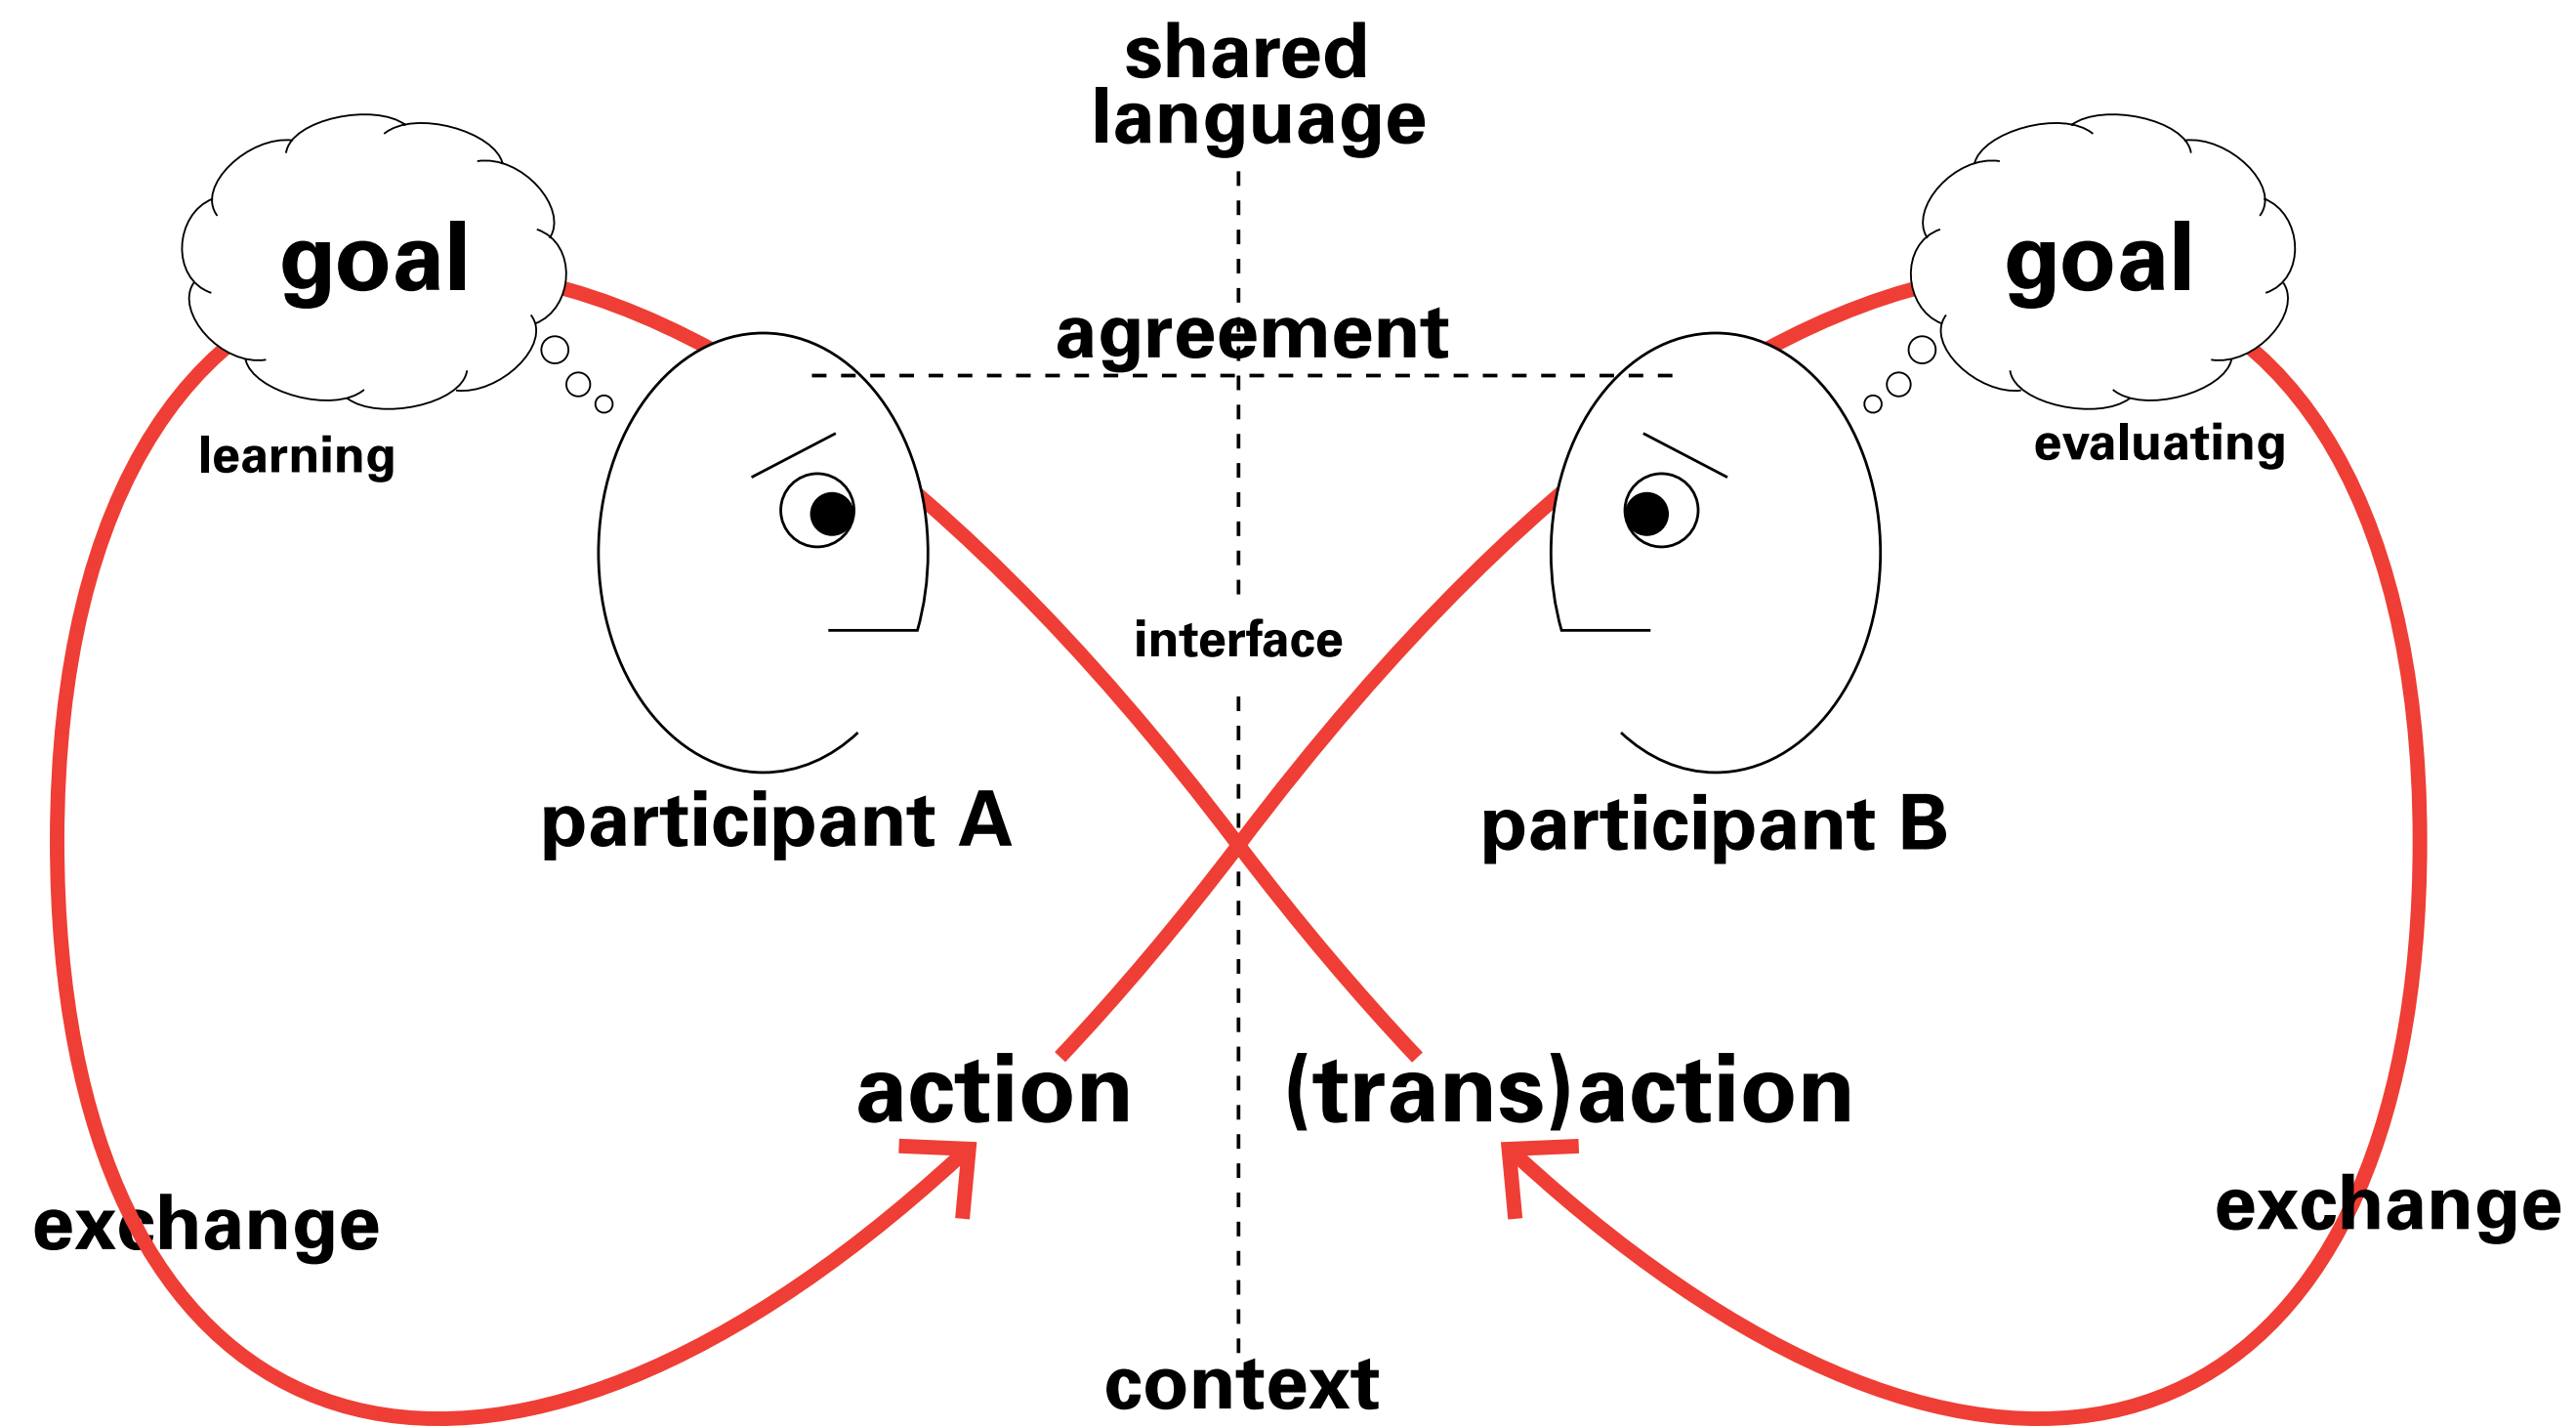

after Dubberly Design Office 2008

Applying Conversation Theory by Gordon Pask — Part 1

Conversation... What is it?

- Context
- Language (Shared)
- Engagement or Exchange
- Agreement
- Transaction or Action

Applying Conversation Theory by Gordon Pask — Part 1

Conversation = **C-L-E-A-T**

- **C**ontext
- **L**anguage (Shared)
- **E**ngagement or Exchange
- **A**greement
- **T**ransaction or Action

Applying C-L-E-A-T

Why does conversation matter?

- to coordinate action, you must reach agreement
- to reach agreement, you must have engagement
- to begin an exchange, you must have shared language

Cooperation and Collaboration require Conversation

Consequences of C-L-E-A-T

What may follow from conversation?

- shared history
- relationship
- trust
- unity

Consequences of C-L-E-A-T

Conversation is the foundation for:

- **community**
- **commerce**
- **culture**
- **government**
- **society**

Applying C-L-E-A-T

Questions for Designing for Conversation

- What channel is being opened to begin the conversation?
Is the interruption reasonable in how and when it intrudes?
What is the bio-cost of the intrusion relative to its benefit?
Are there better ways to interrupt?
- Is the first message clear?
Does it offer something to the recipient?
- Does the exchange convey the potential benefits in continuing?
Is there learning or delight? Is curiosity or interest stimulated?
- Is meaning easily understood—
do the messages speak in the language of the participants?
Are messages sensitive to others' context, needs, interests, values?
How can messages be made more efficient or clear?

“What is Conversation?”

Dubberly & Pangaro
2009

what-is-conversation.html](http://www.dubberly.com/articles/what-is-conversation.html)

Applying C-L-E-A-T

Questions for Designing “CUIs”

- What does the CUI know about the user’s context—
what more can it know, automatically or by input from the user?
- How can a user convey intention *to* the software—
can the CUI be open to the user’s goals, values, preferences?
- Does the CUI evolve during the engagement—
in addition to understanding the user, can it build new knowledge?
- When should the CUI be confident it understands the user—
and when should it double-check?
- Can the CUI’s capabilities build a relationship of trust—
what does that take?

When will CUI’s do all this?

“What is Conversation?”

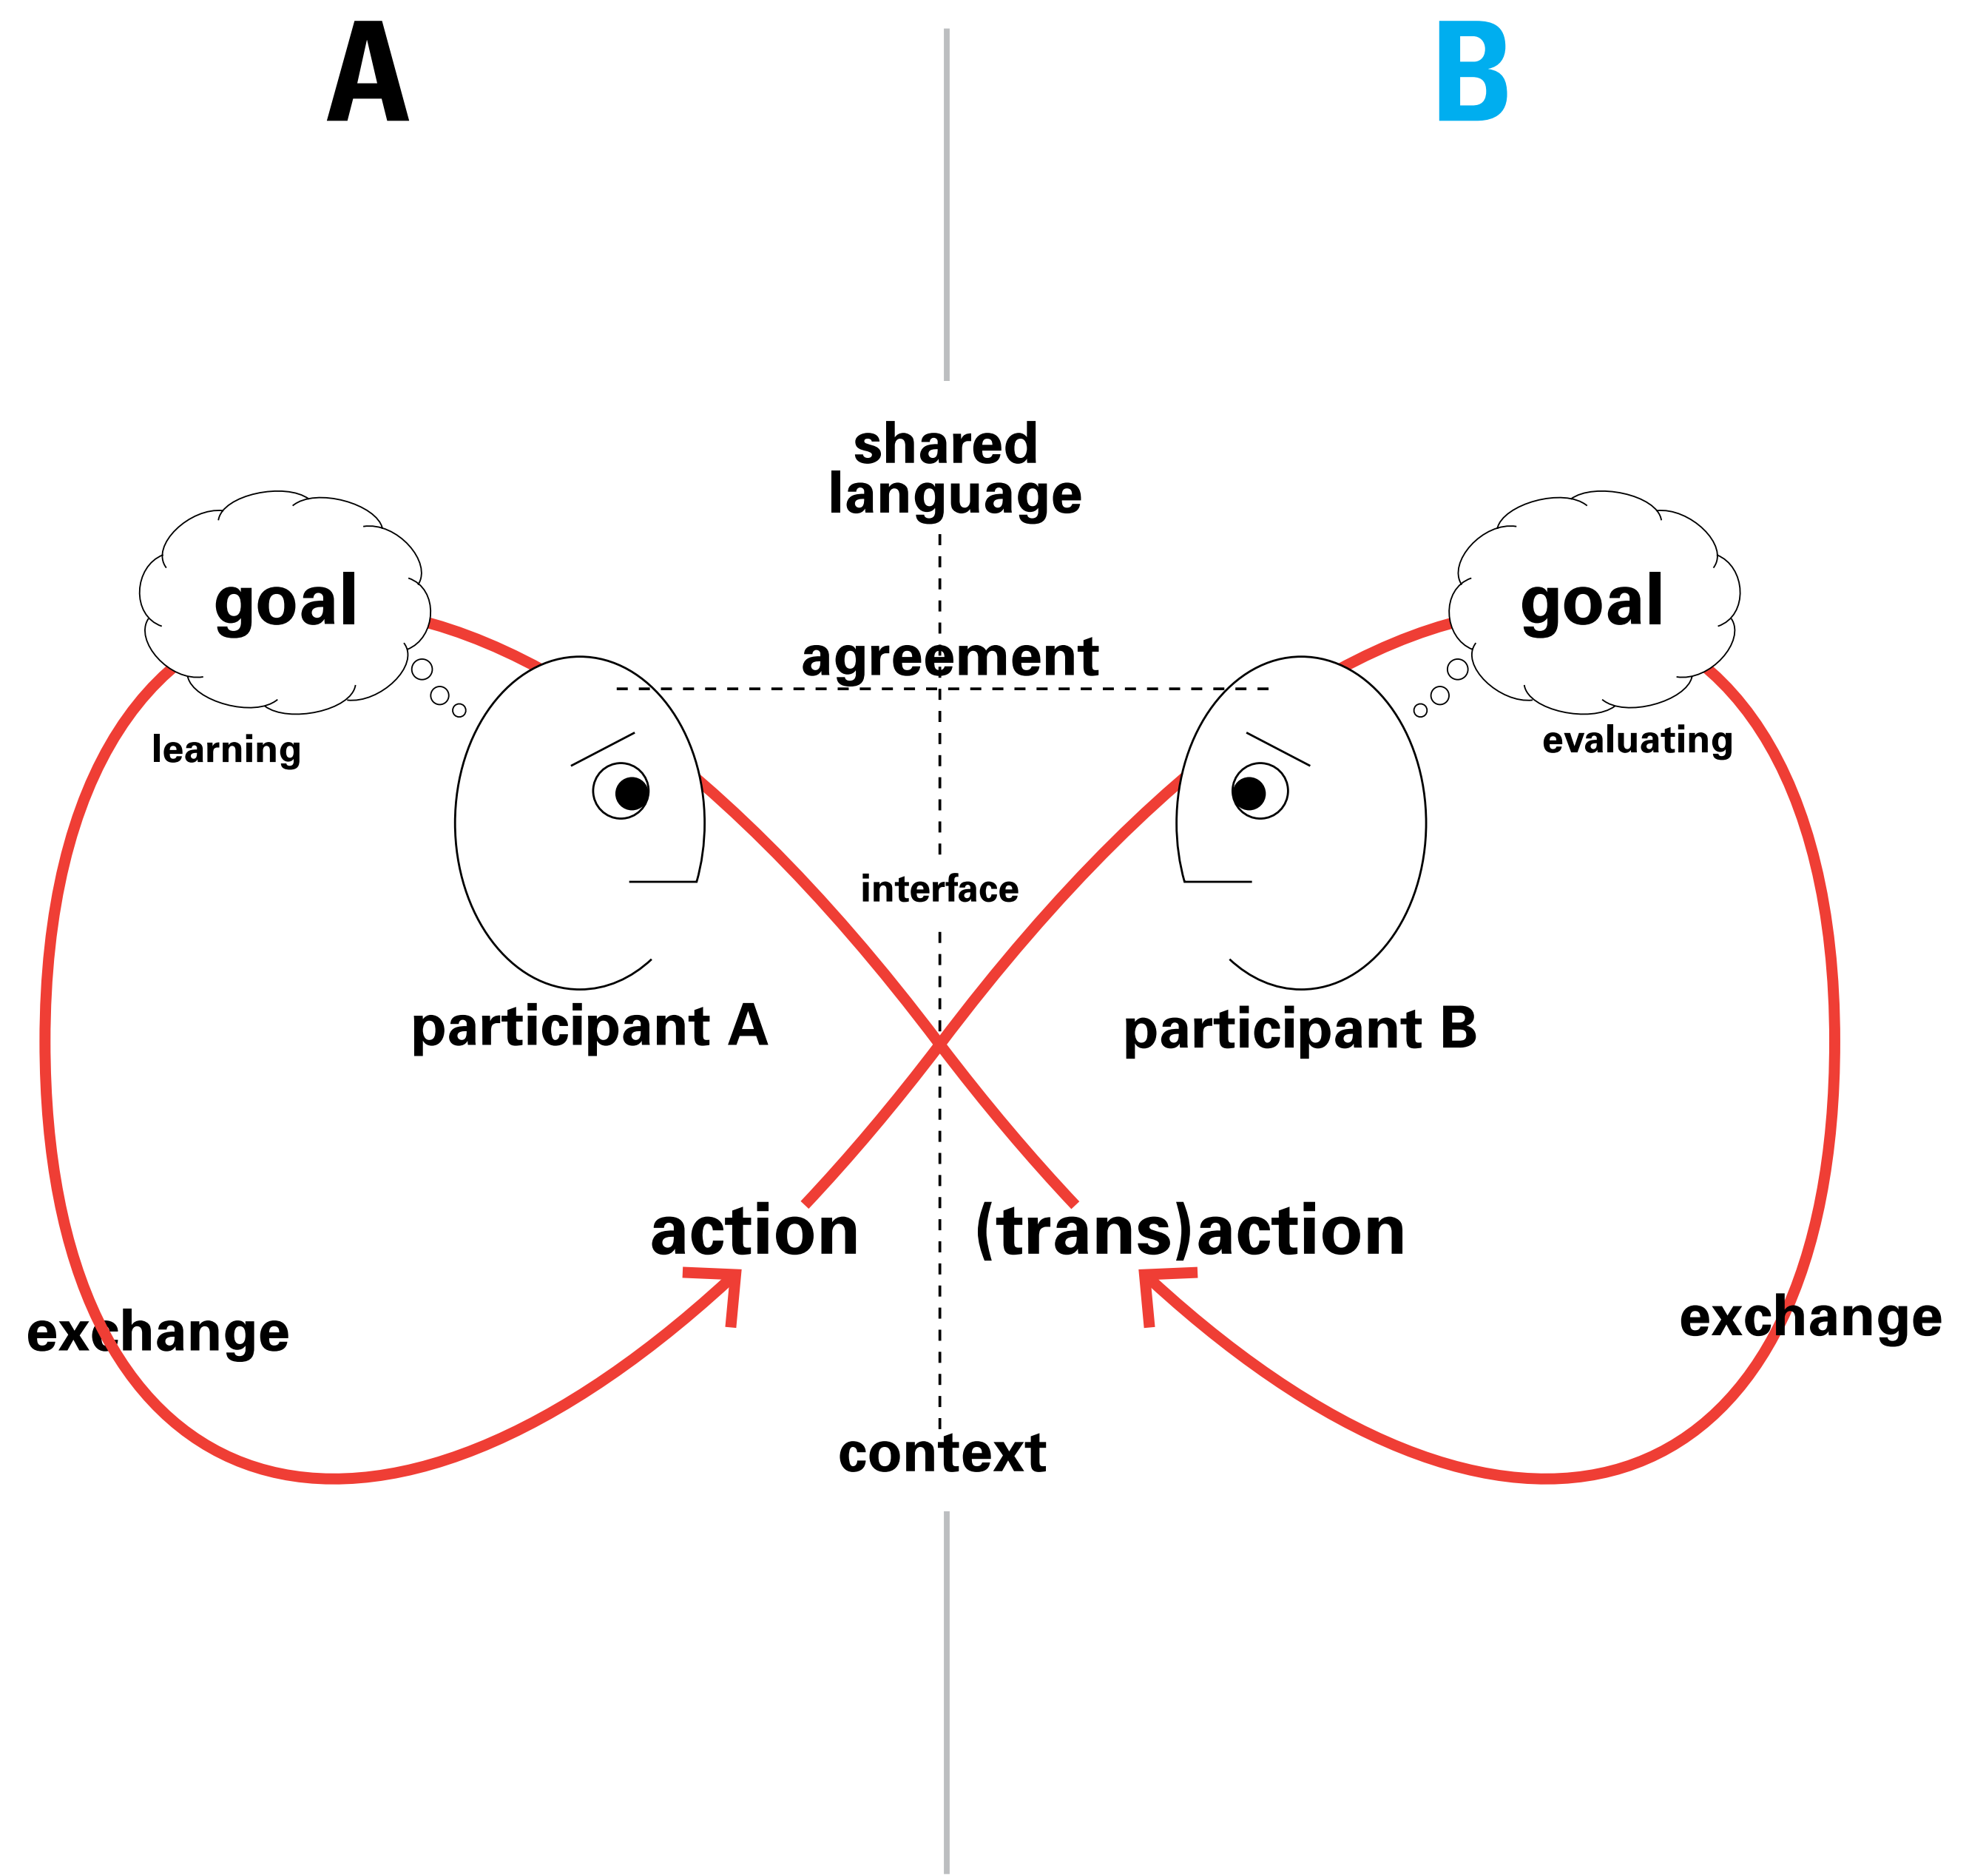

Dubberly & Pangaro
2009

what-is-conversation.html](http://www.dubberly.com/articles/what-is-conversation.html)

Applying Conversation Theory by Gordon Pask – Part 2

What is the foundational structure of conversation?

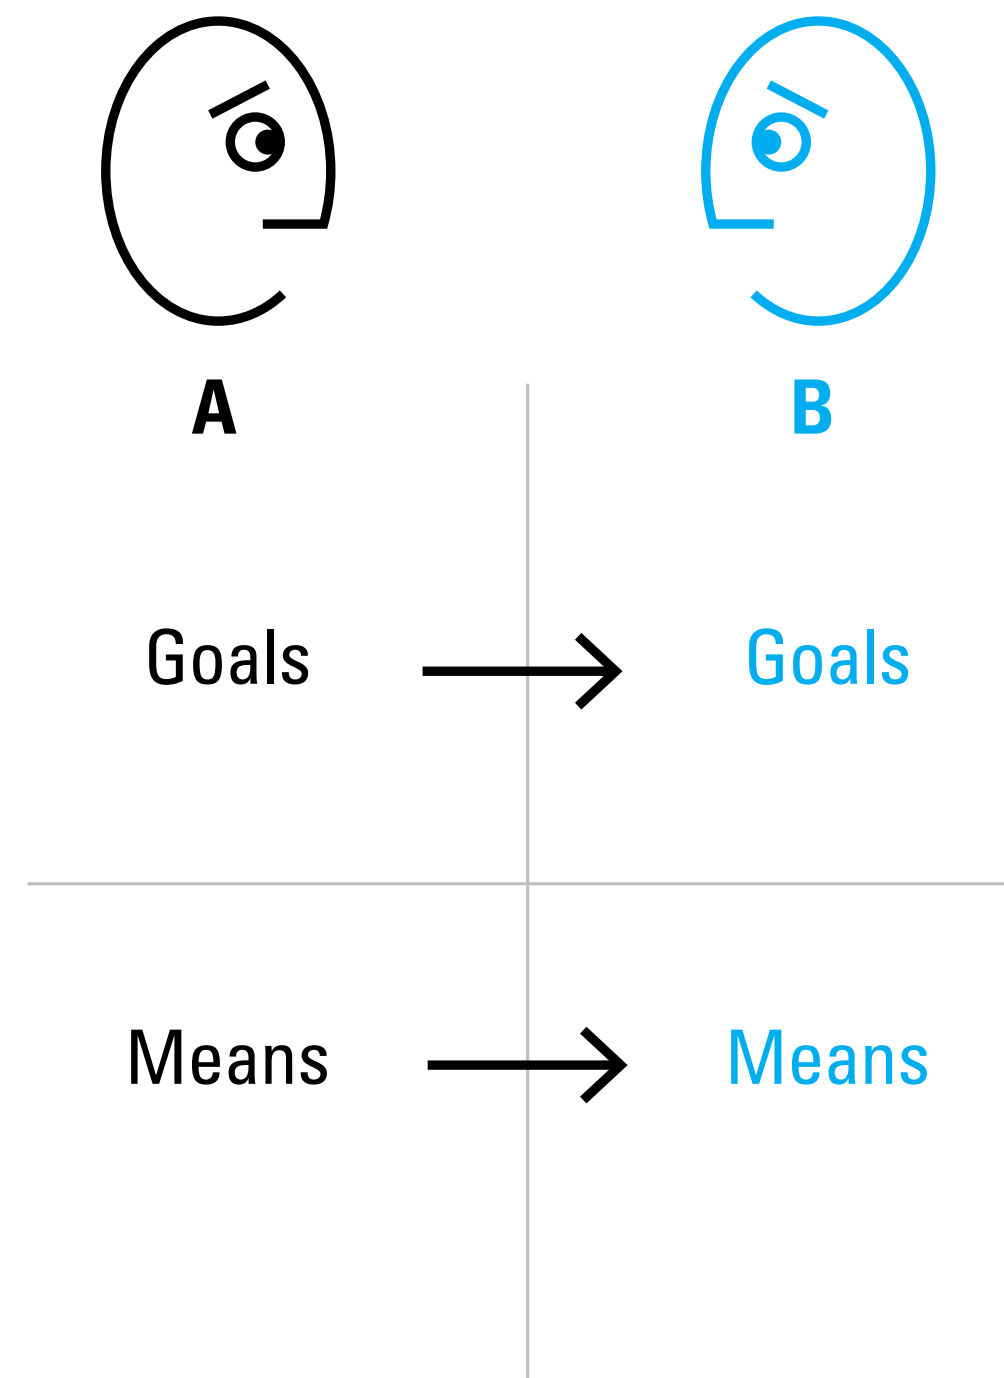

What is an “architecture” for conversation?

Architecture of Conversation

A and B may talk about goals, means, or both

“What is the goal? And how do we want to accomplish it?”

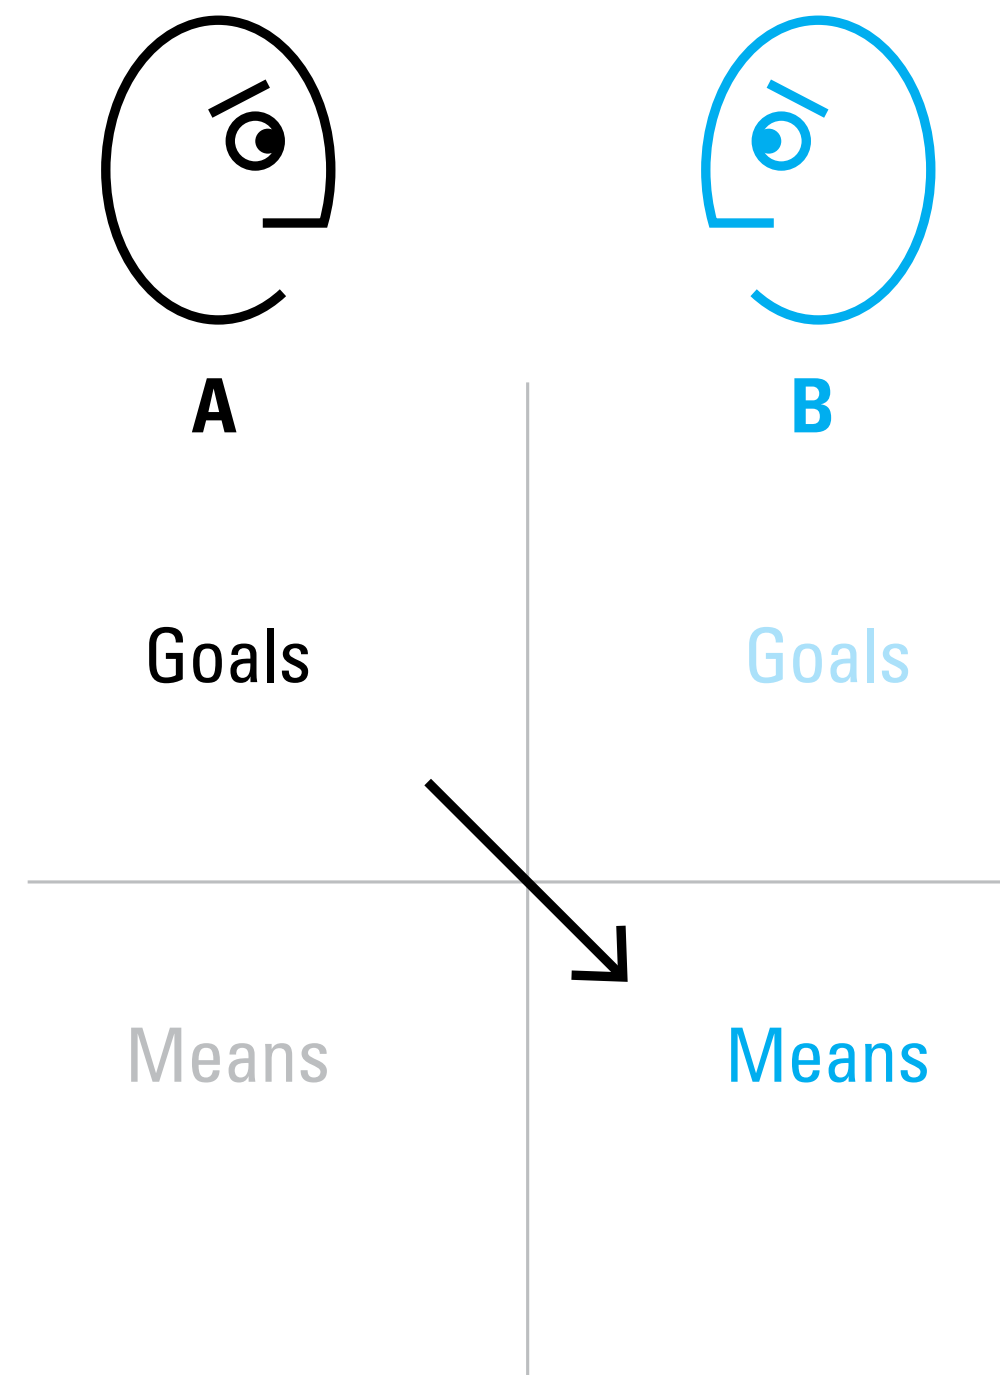

— adopted from Hugh Dubberly
after Paul Pangaro and Gordon Pask

Controlling

A tells B what to do and how to do it

“Alexa, give me some news from NPR.”—does this one

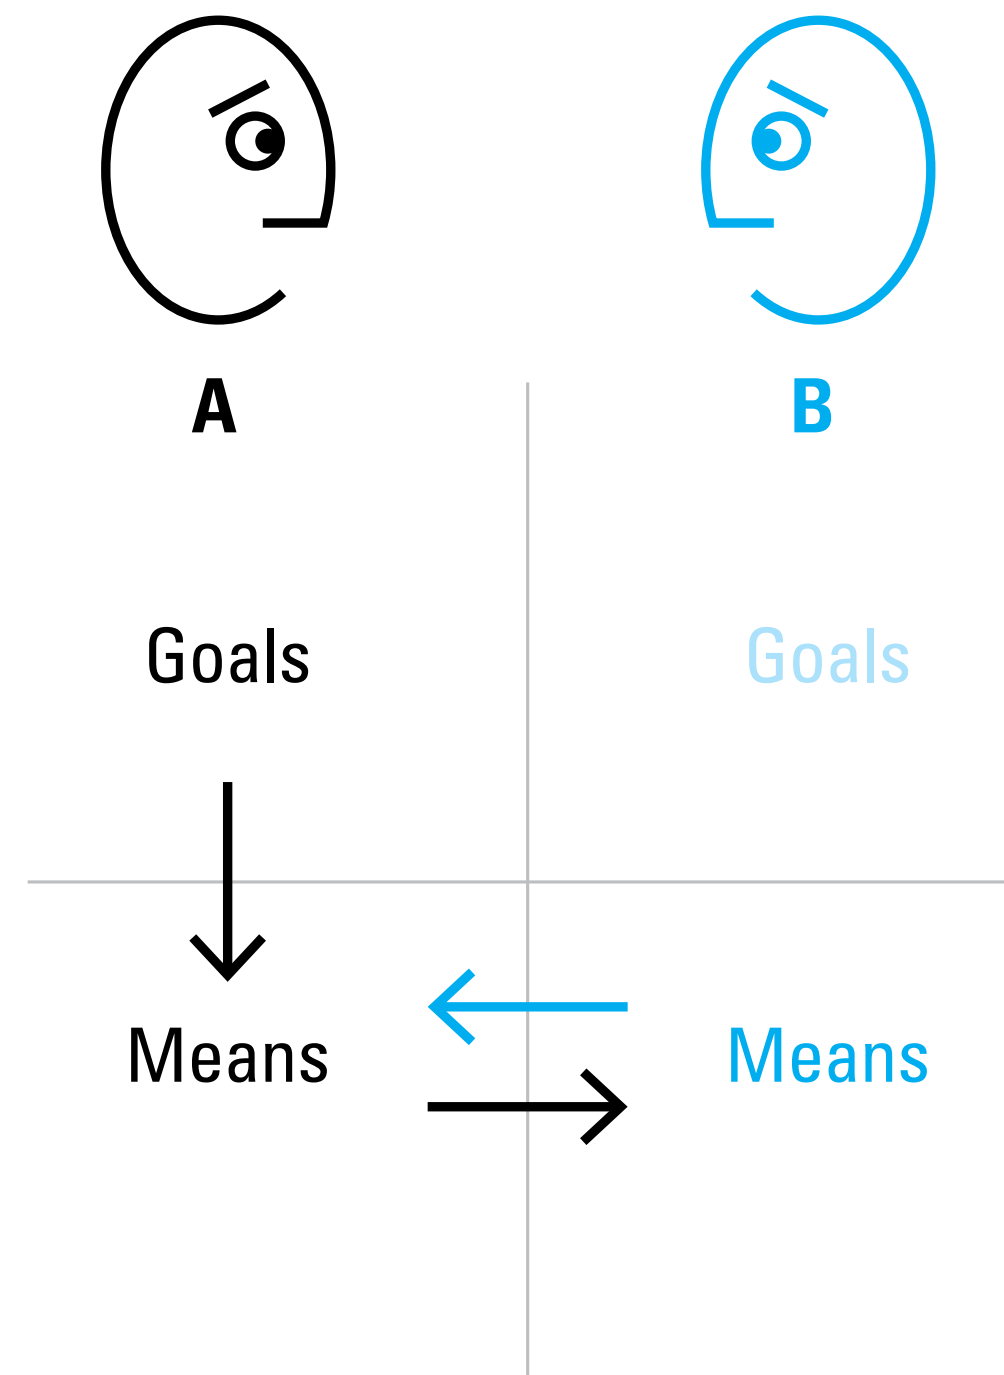

— adopted from Hugh Dubberly
after Paul Pangaro and Gordon Pask

Guiding

A sets goal but discusses means with B

“Alexa, I want to listen to news, what are my options?”

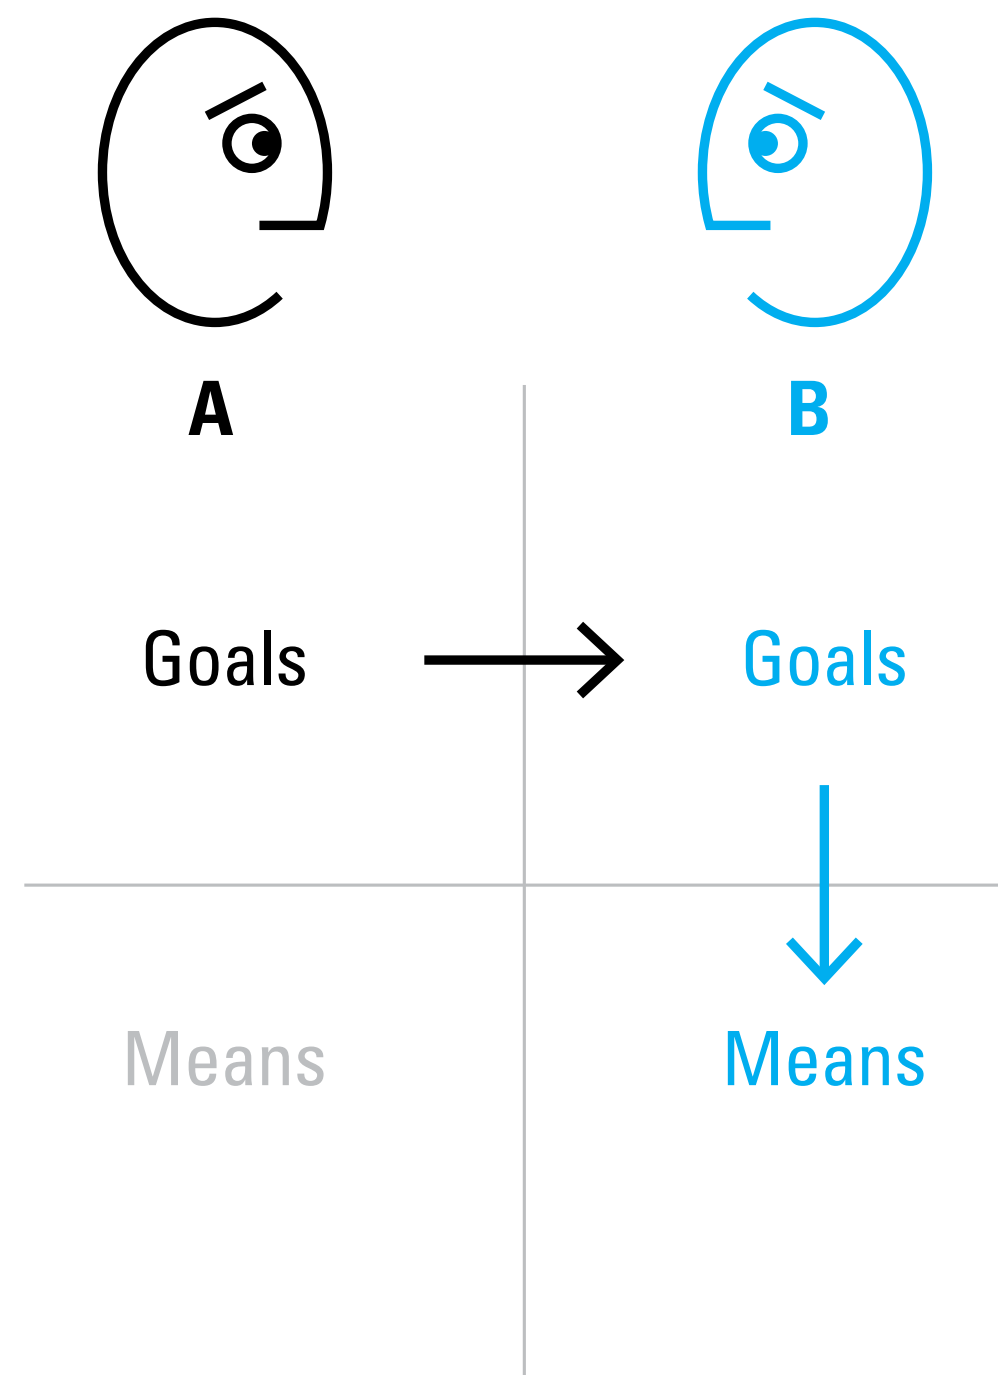

— adopted from Hugh Dubberly
after Paul Pangaro and Gordon Pask

Delegating

A sets the goal but lets B decide the means to reach it

“Alexa, some news please.”—does this one

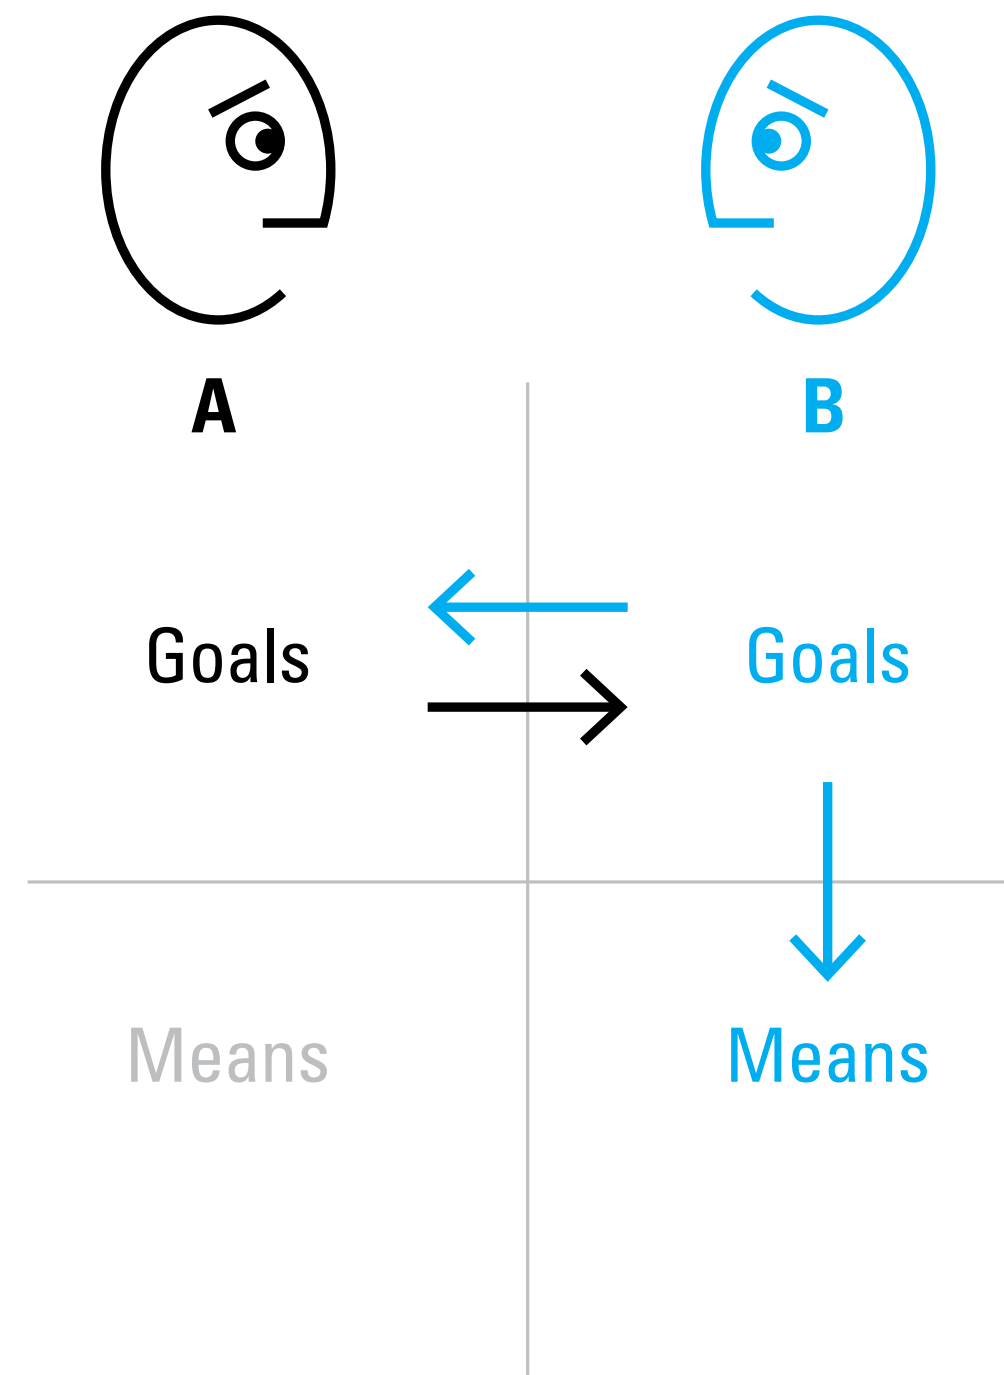

— adopted from Hugh Dubberly
after Paul Pangaro and Gordon Pask

Collaborating

A and B decide together on goals

“Alexa, how about I listen to something?”

— adopted from Hugh Dubberly
after Paul Pangaro and Gordon Pask

Applying an Architecture for Conversation

What kinds of “skills” are there in conversation?

- responding to achieve a given task
- offering different means (tasks) to achieve a goal
- helping to achieve an underspecified goal
- collaborating to define the goal

Will CUI's be designed to do all these?

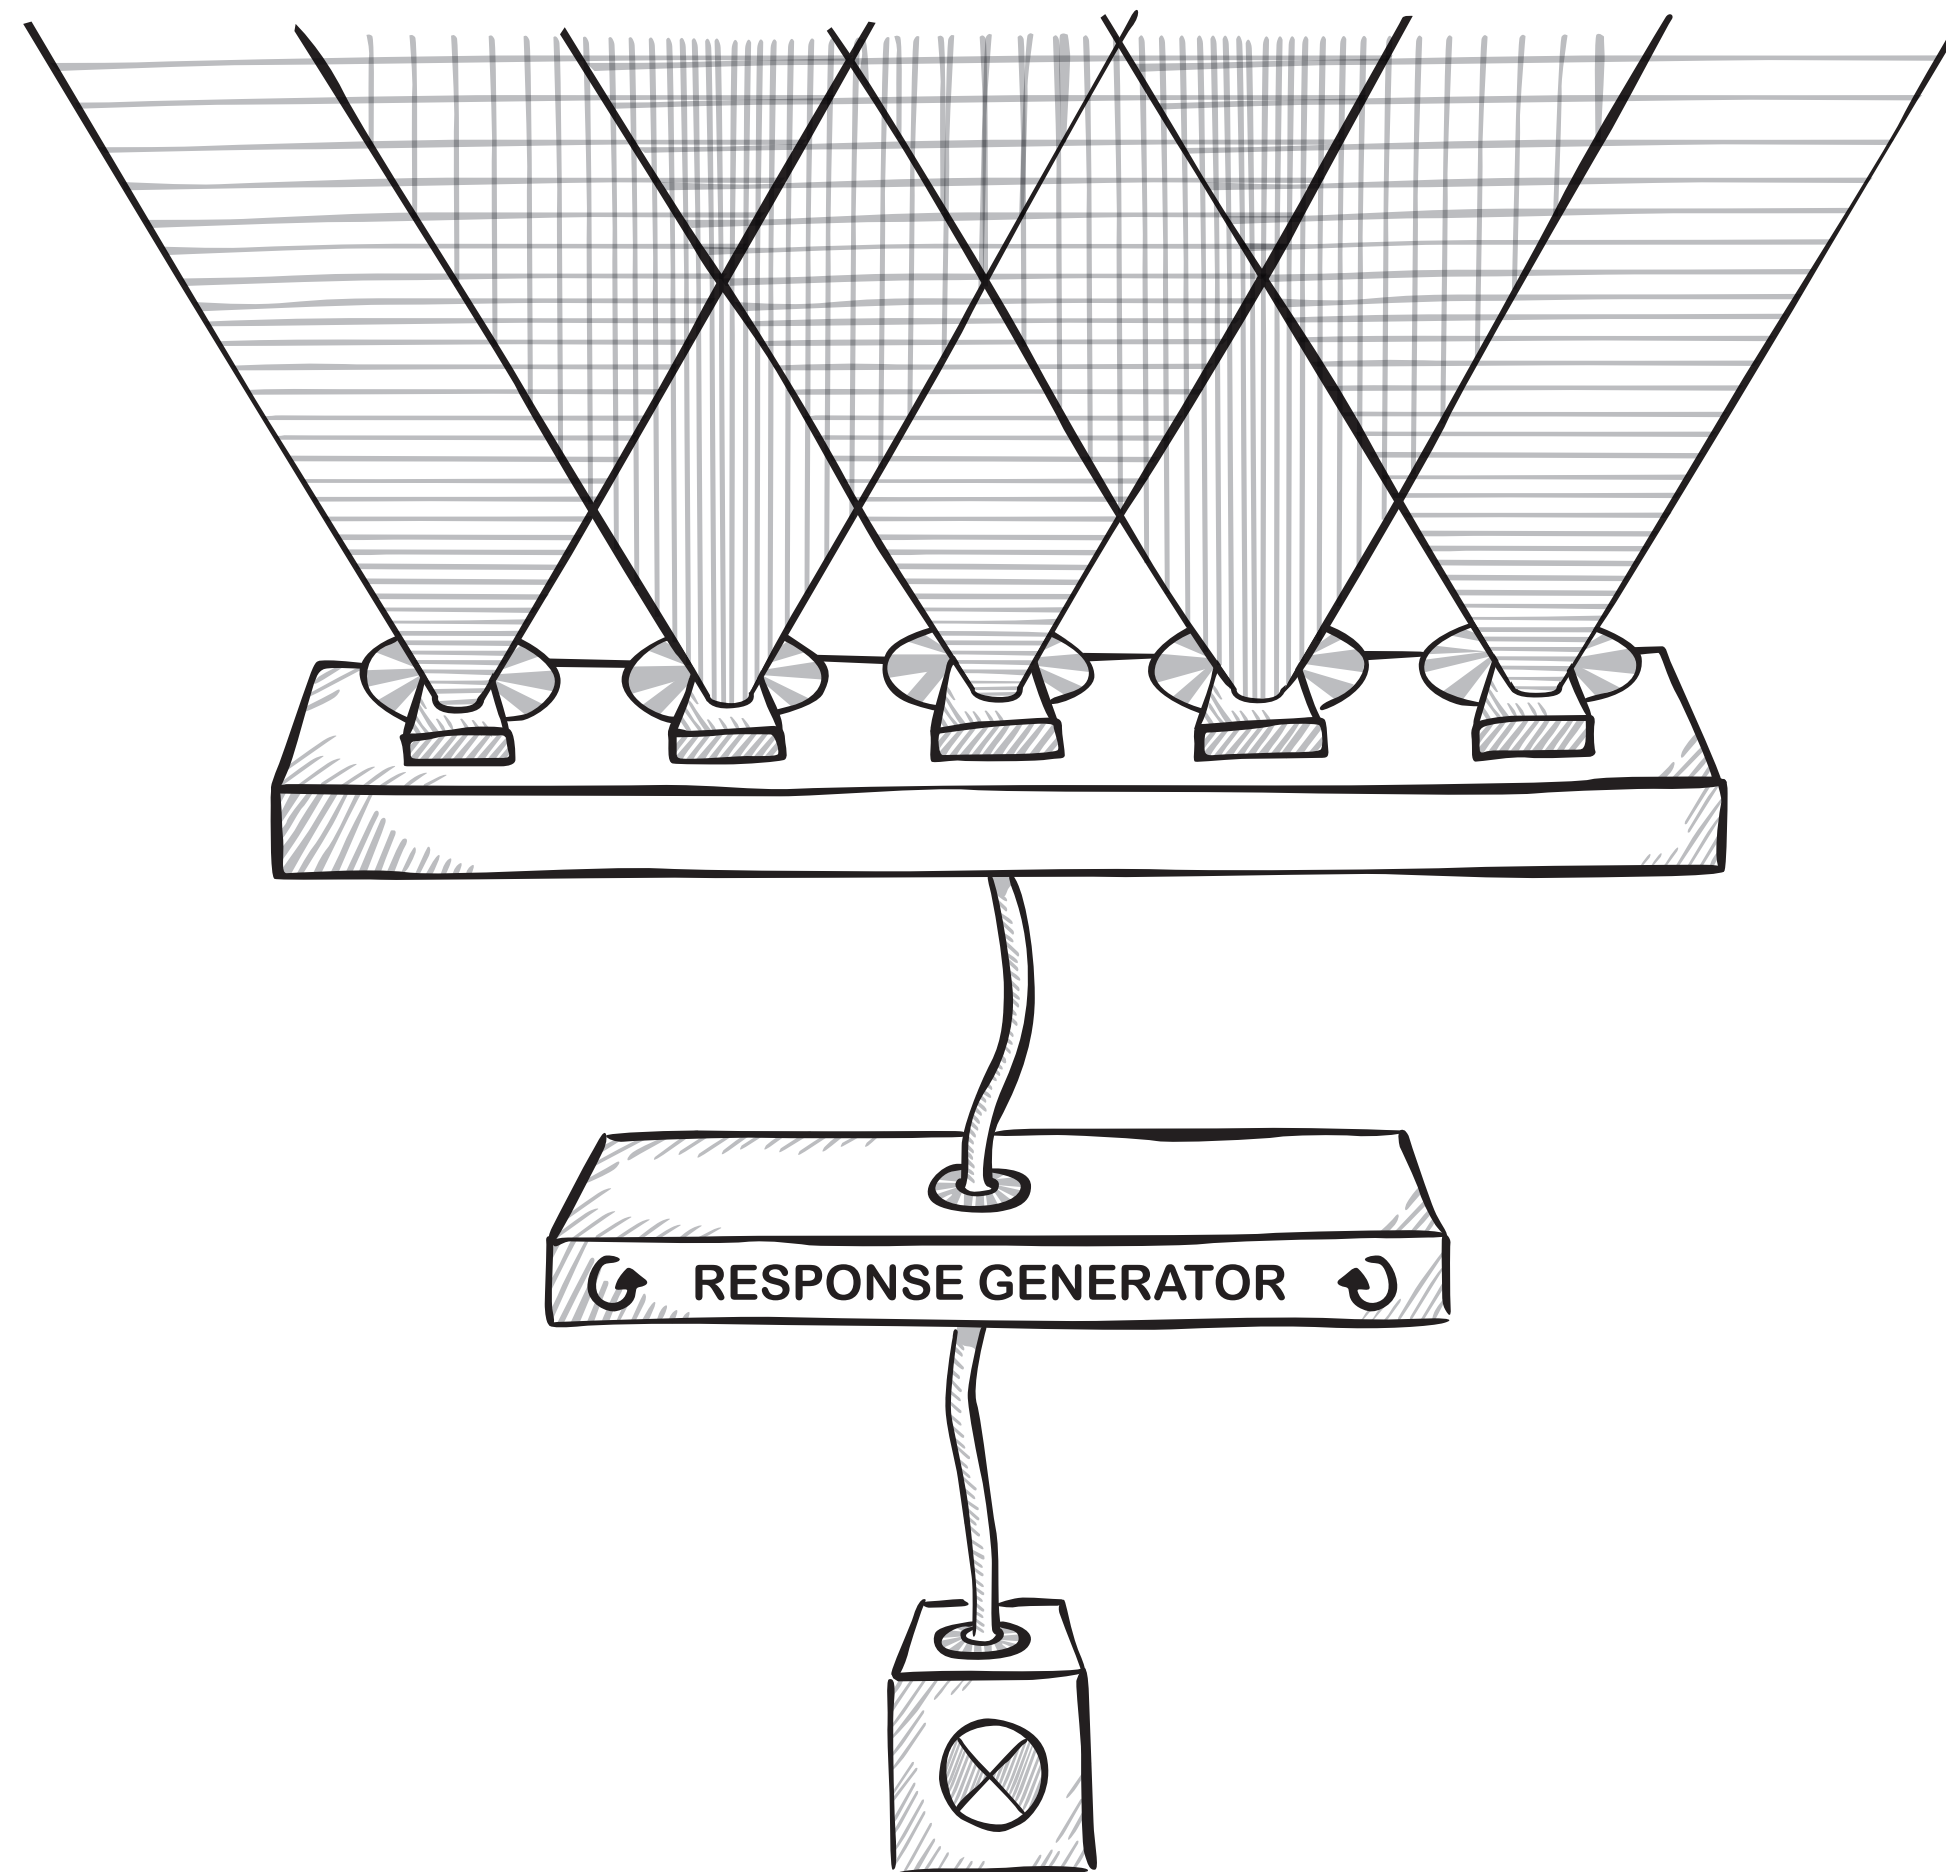

But can a machine have a real conversation?

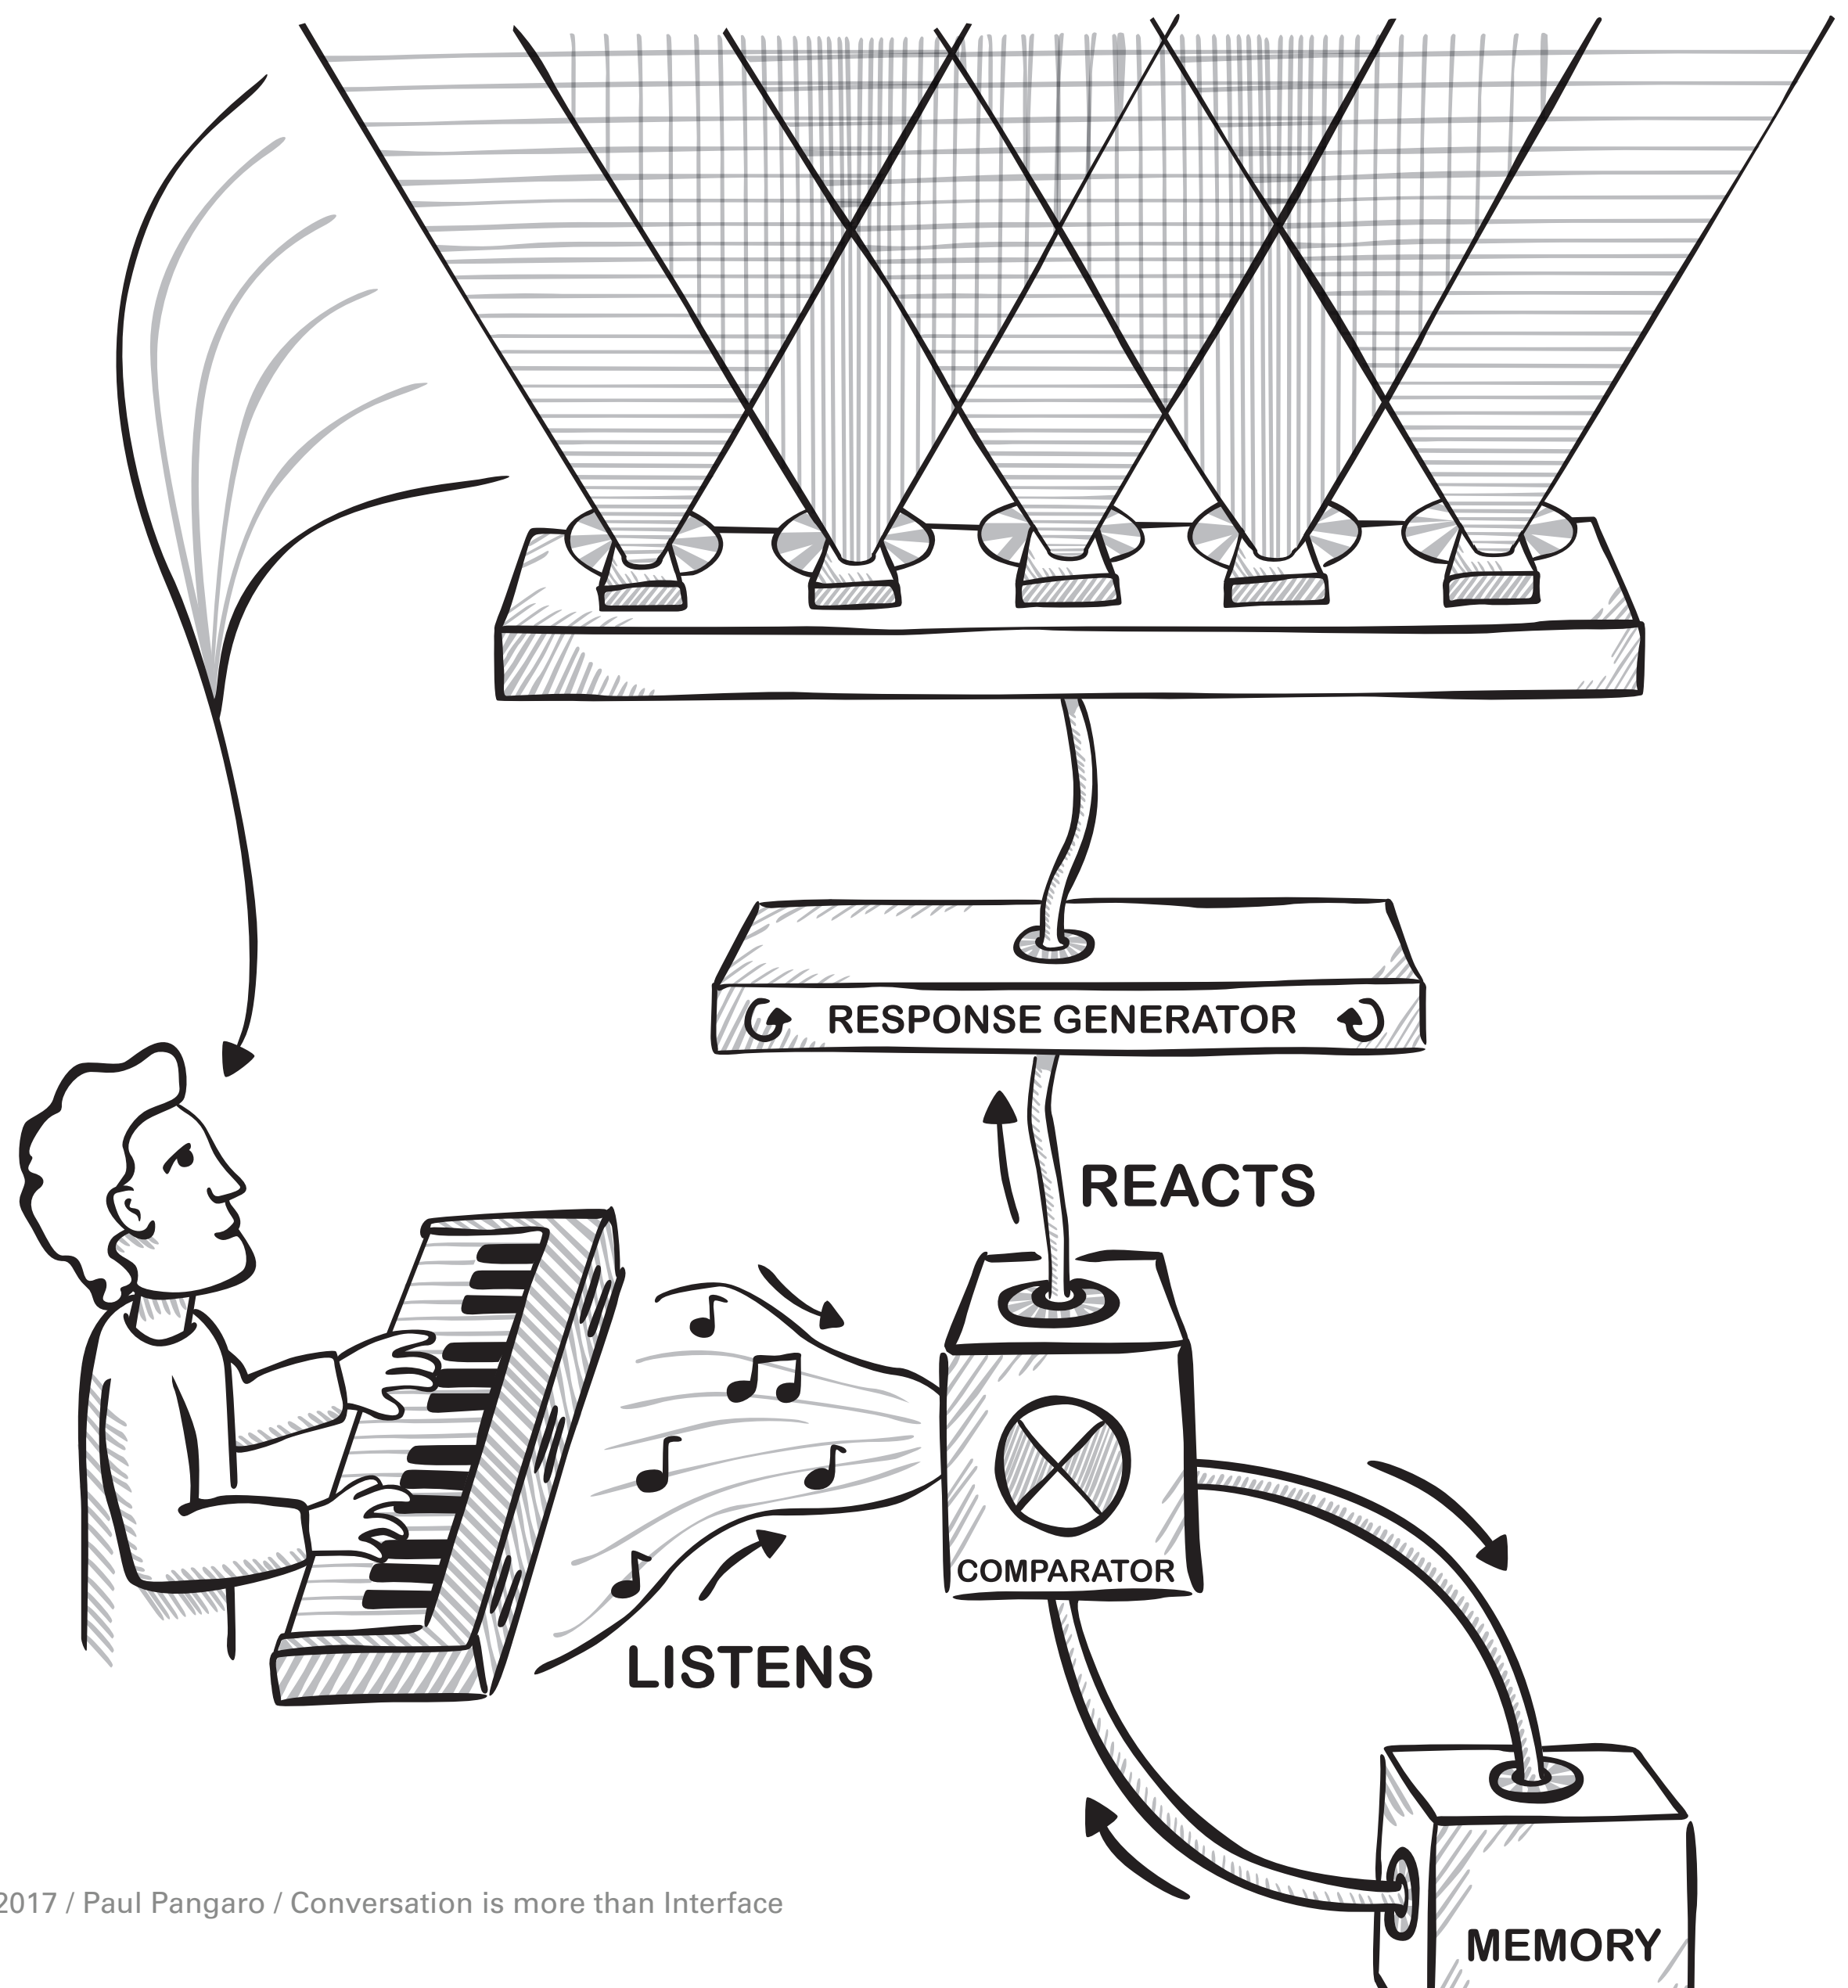

Amazon Echo. (Credit: AP Photo/Mark Lennihan)

Conversation with Content

What's a "good conversation"?

- avoids repetition
- continually offers something novel
- ... while maintaining continuity
- helps you be what you want to be... to become
- asks great questions...

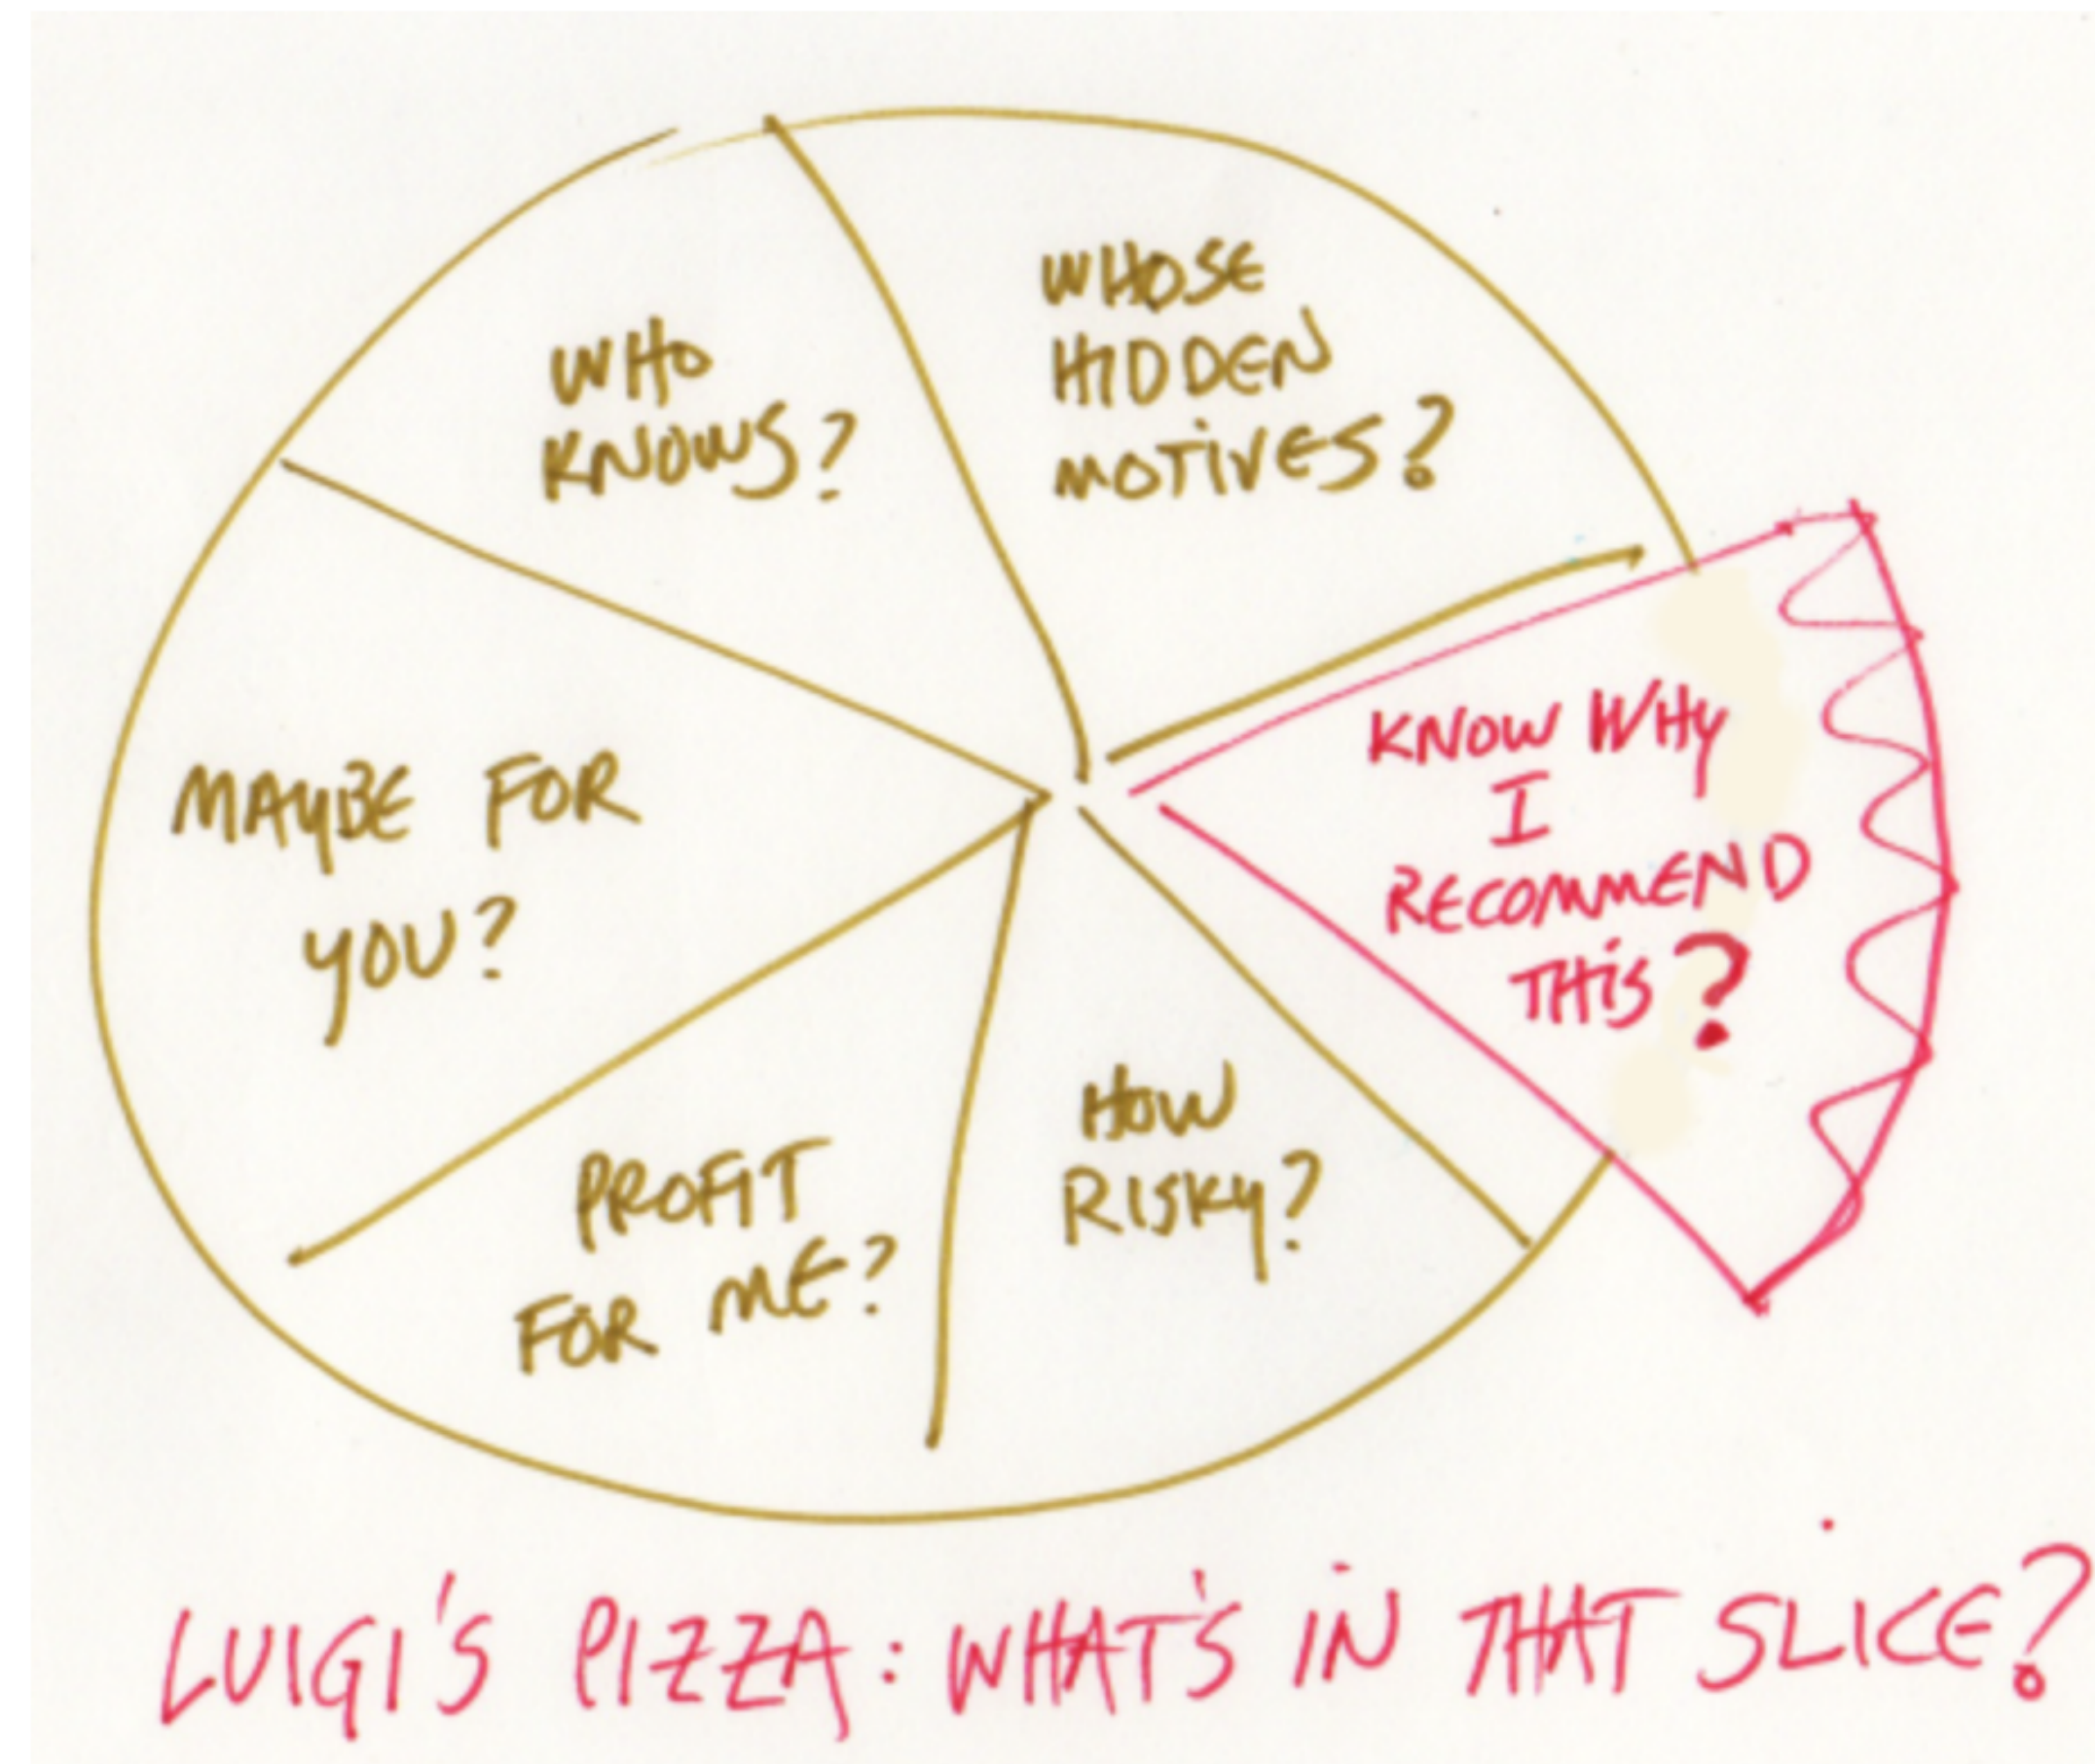

Why can't CUI's do all these?

Provocations

- What is “Conversation”?
- Can we “Design for Conversation”?
- Read any plays by David Mamet?
- Know the Parable of Luigi’s Pizza?

Luigi's Pizza: A Parable

November 8, 2016

Say you want to eat somewhere and you ask for my recommendation. I say, "Sure, I've got the best place for you: Luigi's Pizza, on the corner of First & Commerce."

Thank you.

User Conversation Model 2006 Consumer Health Portal

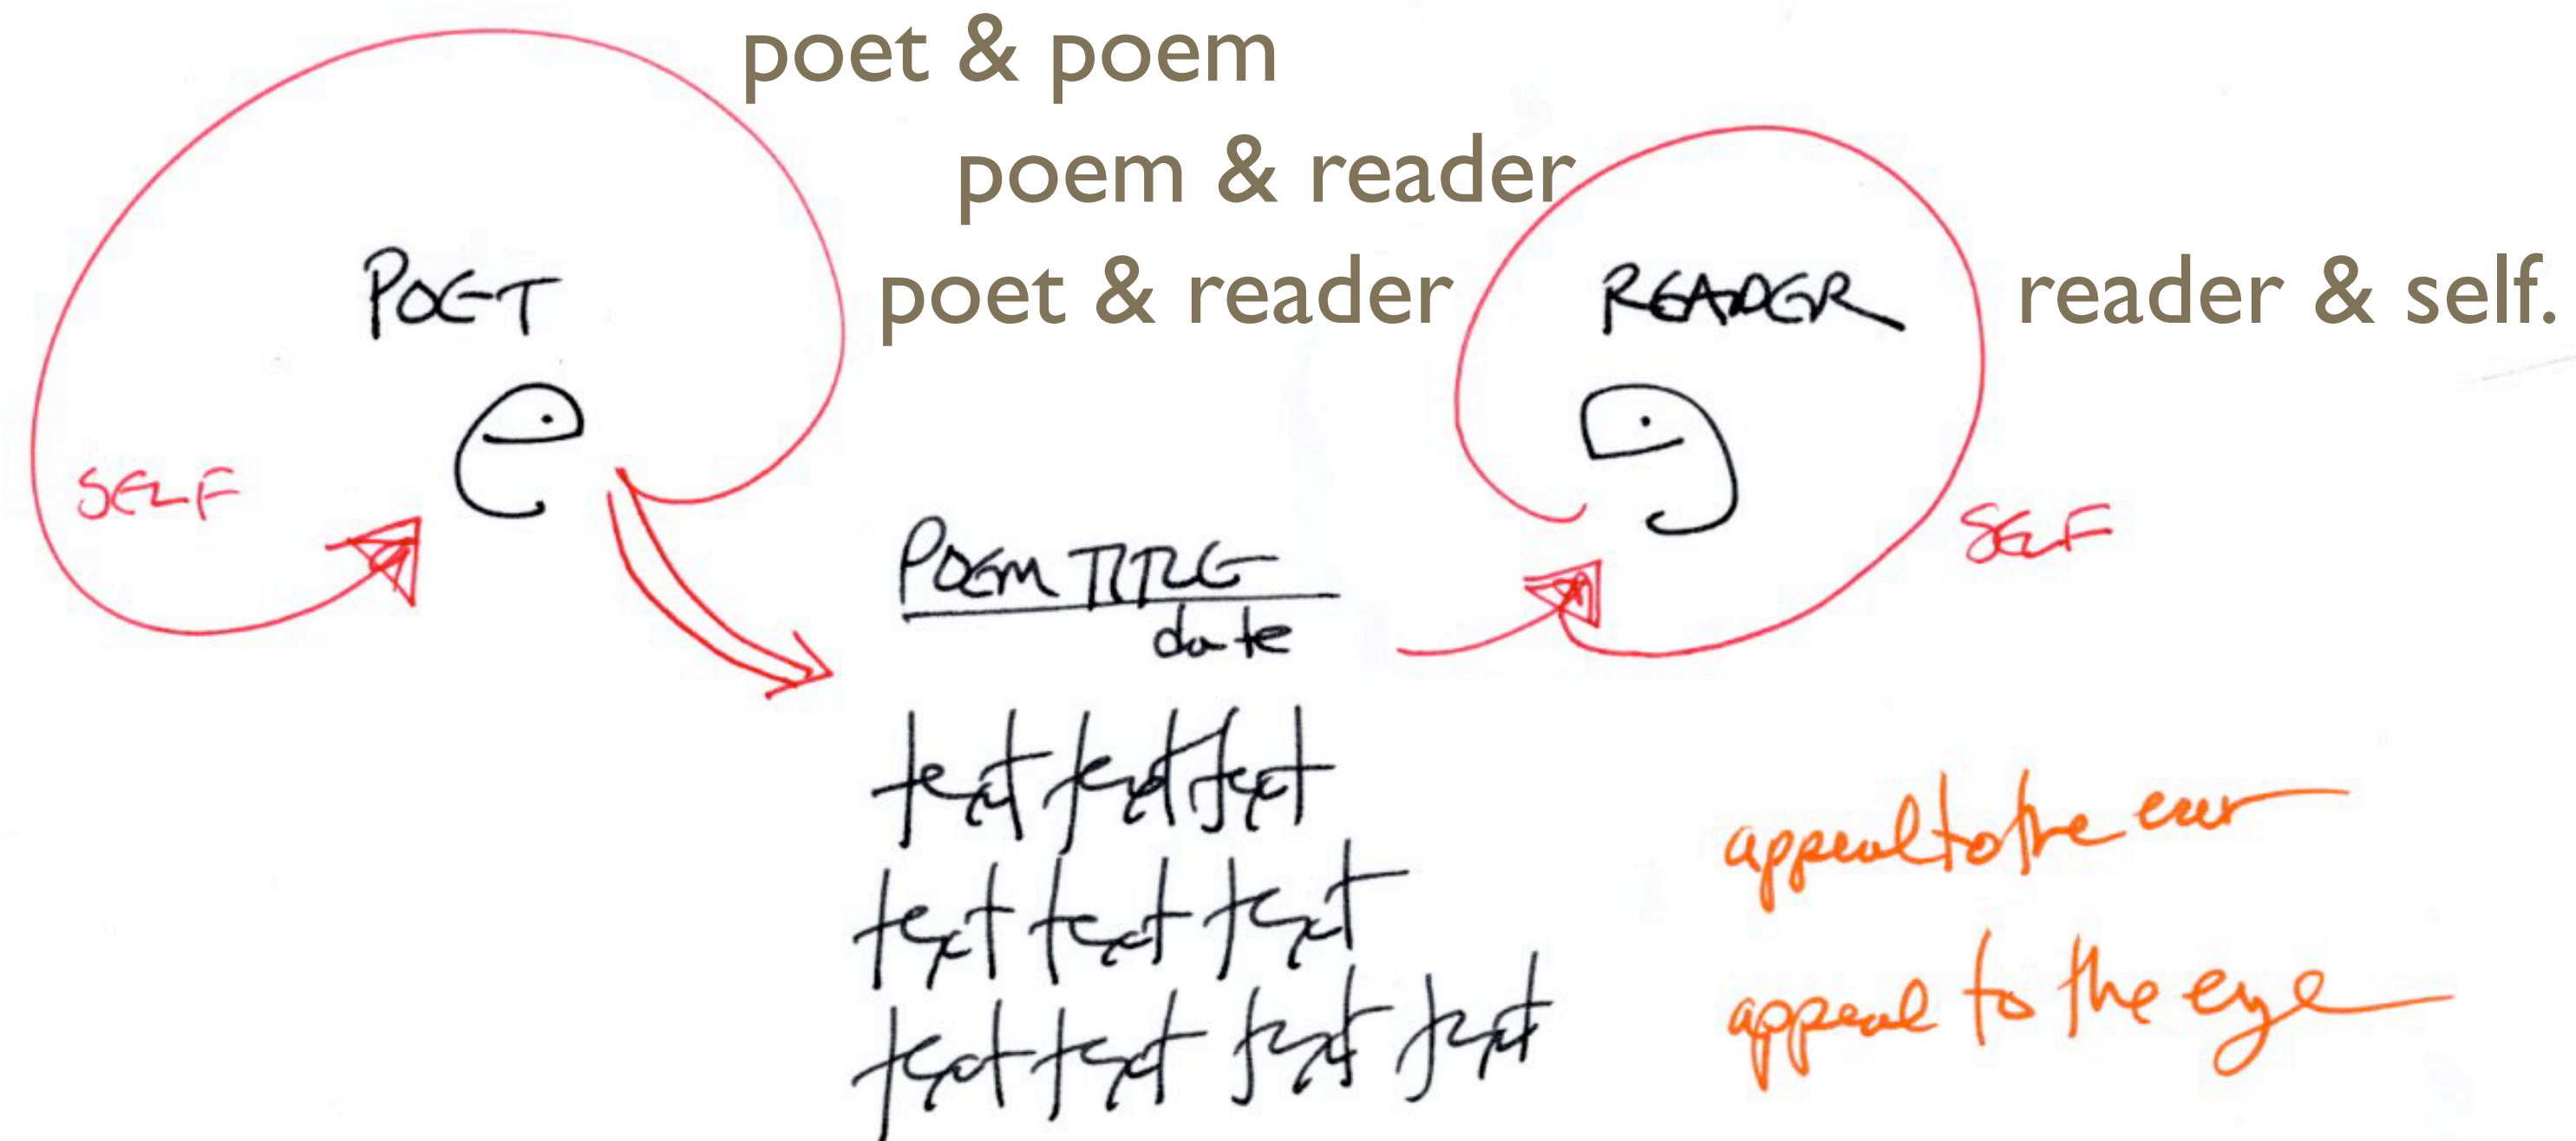

being
RE PROFESSIONAL

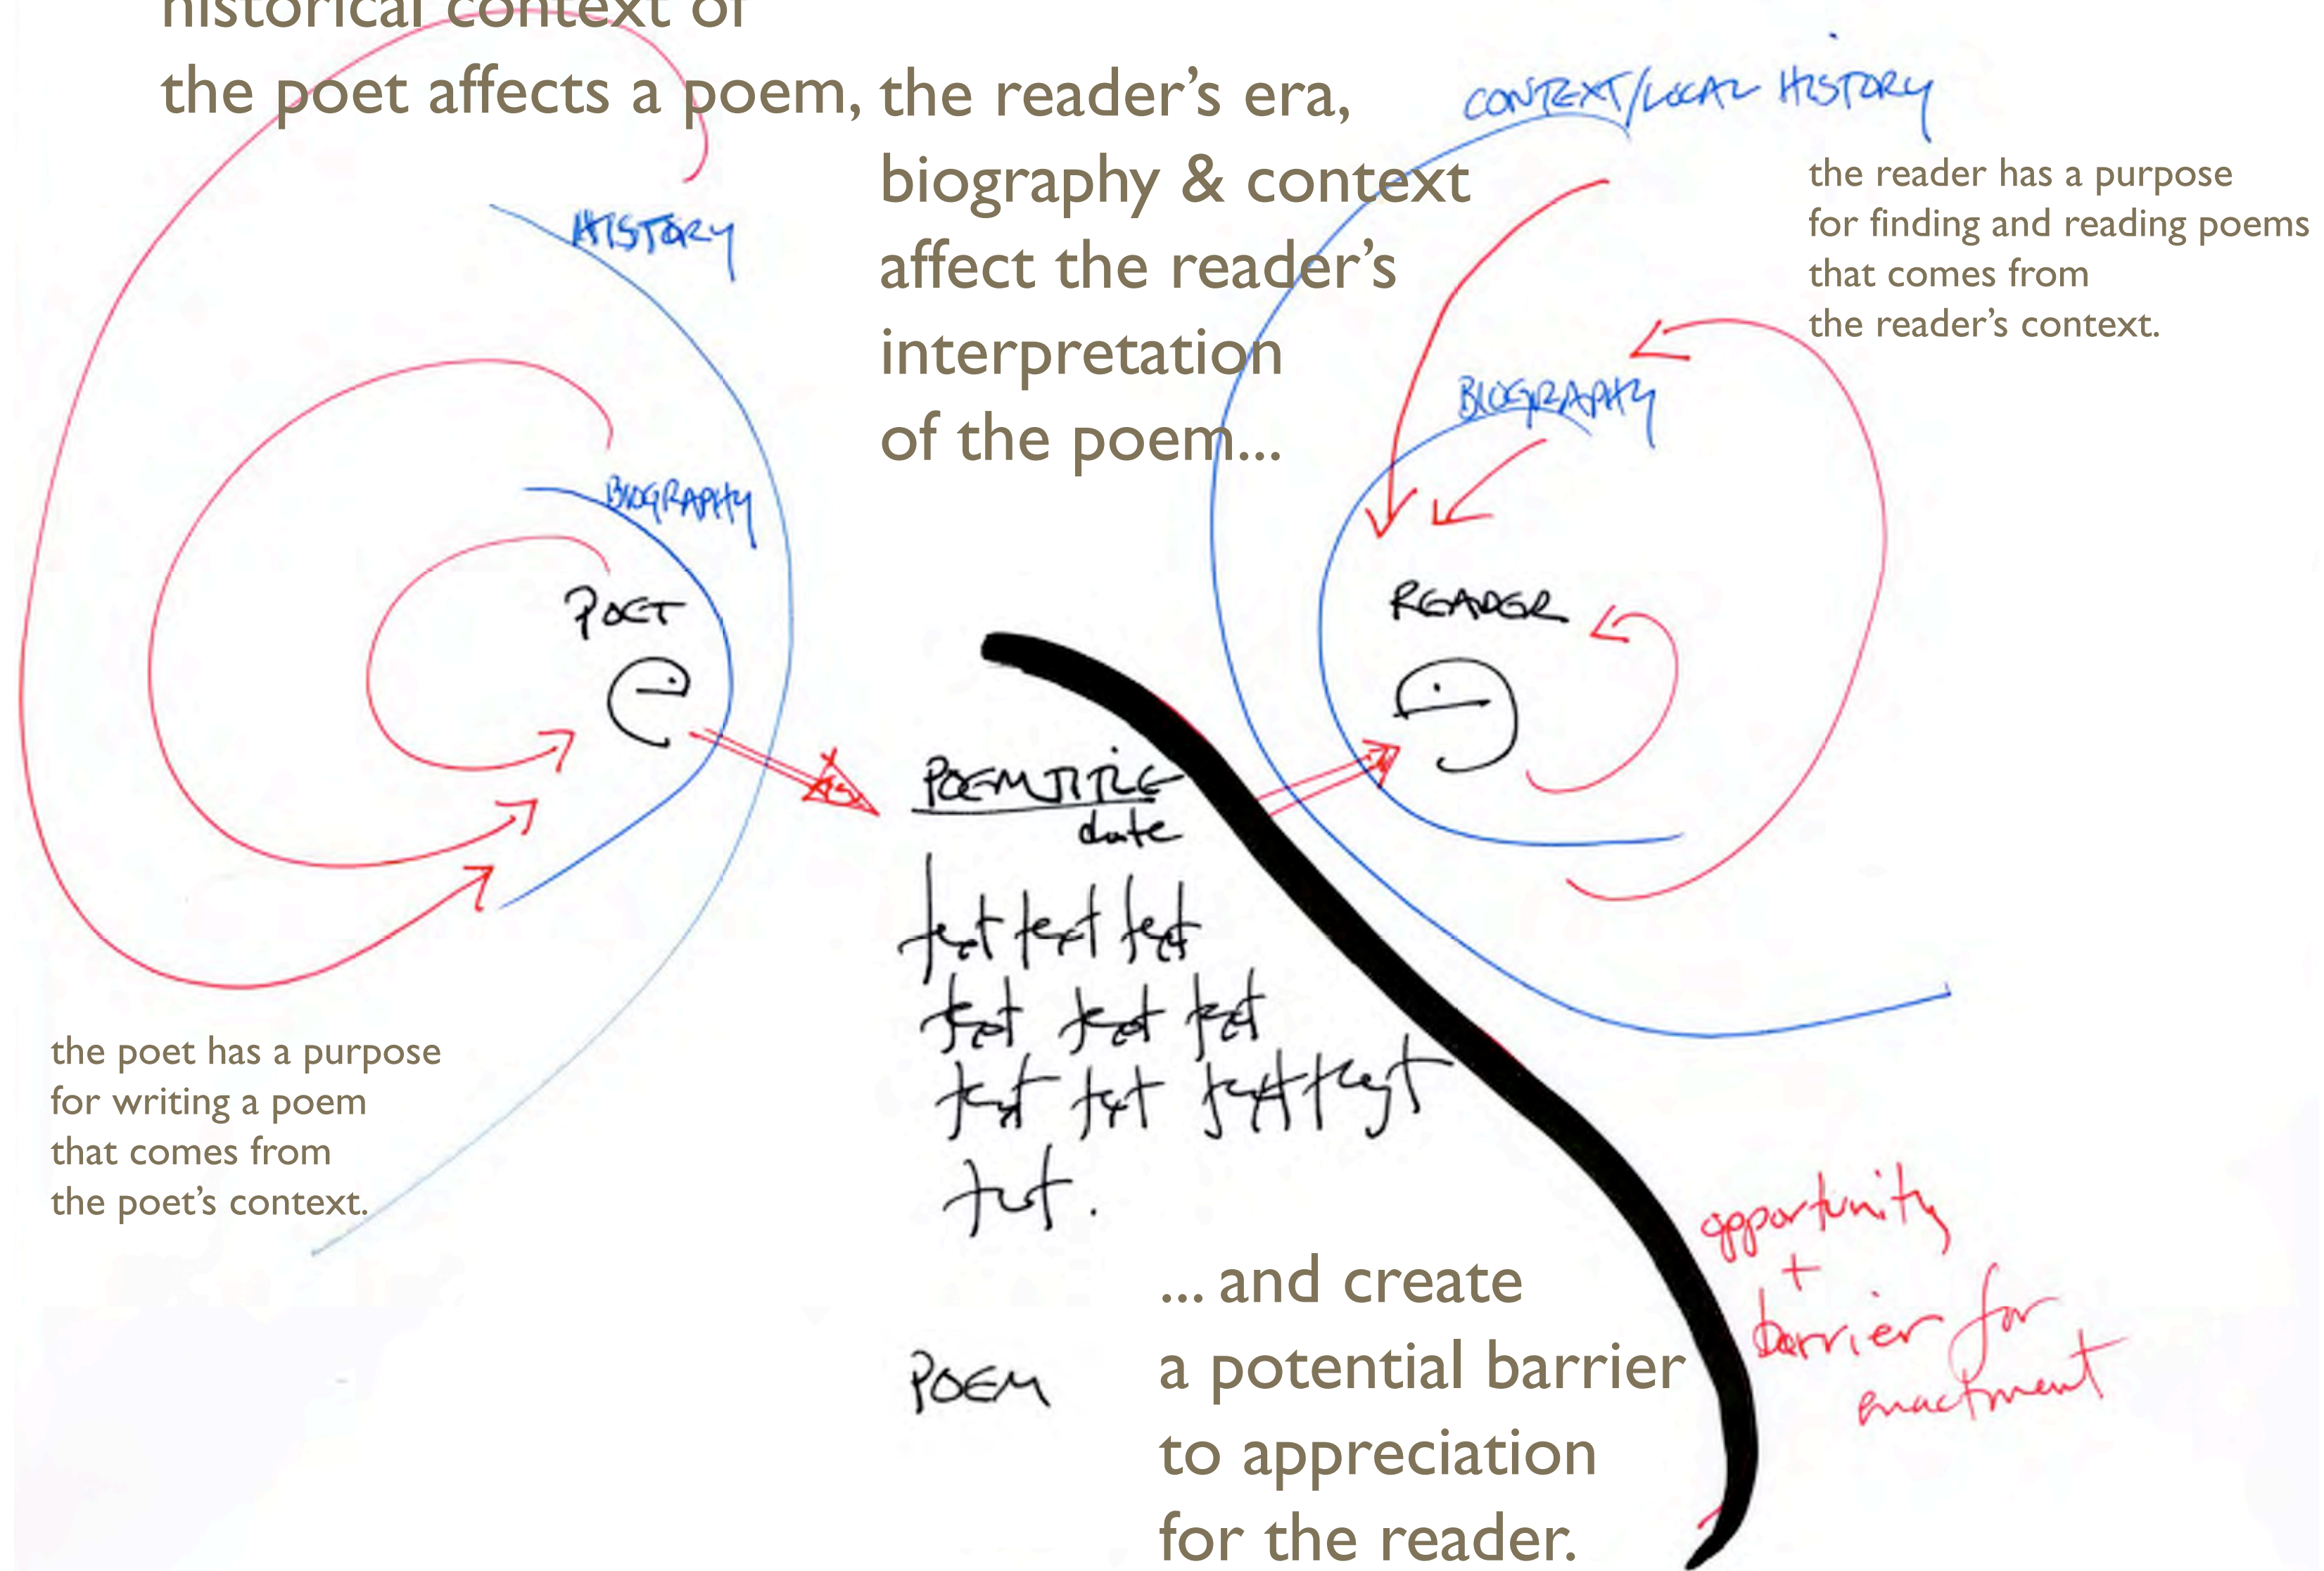

poetry is essentially dialog. dialog is a dynamic relationship.
poetrymachine's purpose is to enact dialog between
poet & self

Design for a Poetry Machine 2007
PoetryFoundation.org

just as the biography & historical context of the poet affects a poem, the reader's era, biography & context affect the reader's interpretation of the poem...

the poet has a purpose for writing a poem that comes from the poet's context.

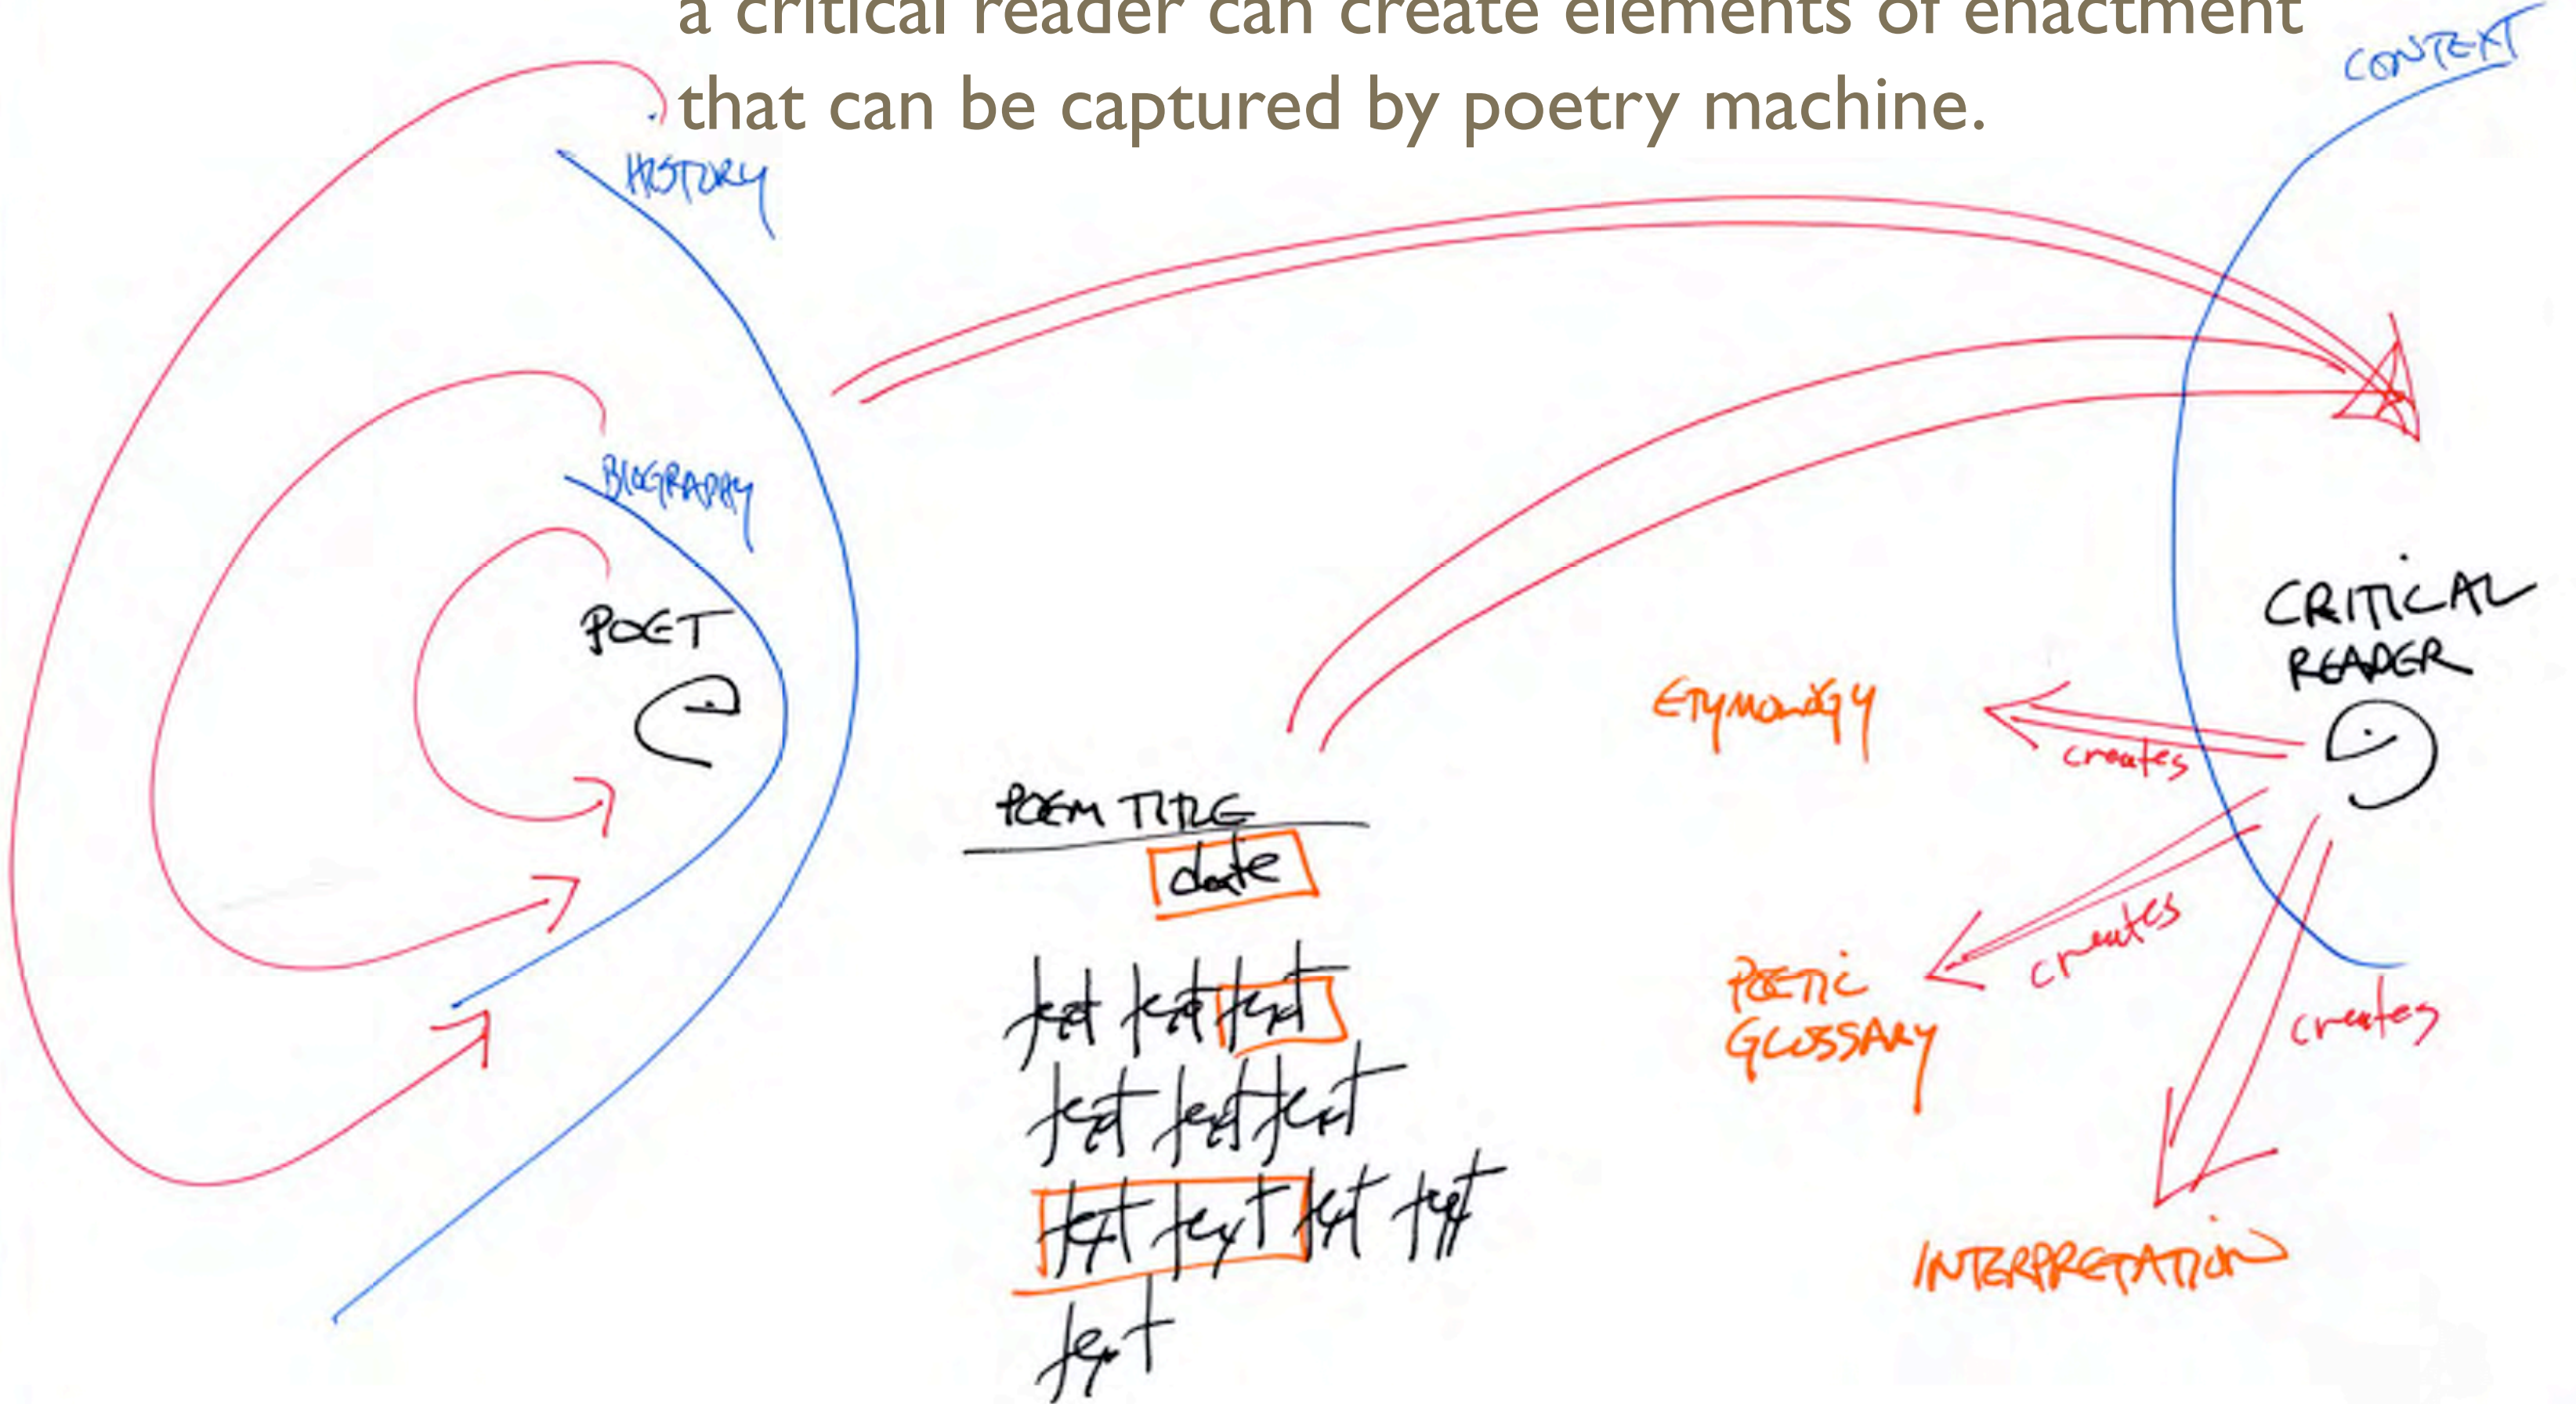

the reader has a purpose for finding and reading poems that comes from the reader's context.

POEM TITLE
date
 test test test
 test test test
 test test test test
 test.

POEM ... and create a potential barrier to appreciation for the reader.

opportunity + barrier for enactment

from an understanding of the poet's biography, historical context, and the poem itself, a critical reader can create elements of enactment that can be captured by poetry machine.

many readers could provide these perspectives, giving poetry machine a rich storehouse of enactments.

poetrymachine's storehouse of enactments creates a dynamic software interface.

if poetrymachine knows a little about a reader's context and biography—level of experience with poetry, purpose in seeking poetry, or prior poems read, for example—it can create a personalized enactment layer by choosing specific elements of enactment to present to that specific reader.

the enactment layer enables a dialog that connects poem & reader, poet & reader, reader & self.
